Heat with Oil and Save Labor.

Perhaps you are one who has become tired of stocking the furnace in winter, tired of the dirt and dust the furnace makes, and coal bills that each year cut deeply into the money apportioned for household expense. There is a way to save all this. Install a Standard Oil Burner.

You may say that this the beginning of winter is no time to think of a new heating system for your home. On the contraary this is exactly the time to give the problem of heating your earnest consideration. In spring when it begins to get warmer a furnace fire occasionally makes the house uncomfortable but you are afraid to permit the fire to go out knowing the effort required to start a furnace fire.

A Standard Oil Burner which is being sold by C.P Howe of 40 Thurston Rd., obviates the expense, the effort, and the uncomfortableness of maintaining a furnace fire during the days of Spring. With a Standard oil Burner you need only to turn on the heat when heat is needed the manipulation of a lever in the morning when your house is cold will start the heat. When the house is warm another turn of a lever and the heat is turned off. It is all as simple as the telling.

Standard Oil Burners permit the householder to get away forever from that everlasting job of shoveling coal. It keeps his cellar clean. It is cheap to operate. People who have never used this form of heating or investigated it are ready to tell you of its many disadvantages. But the man who has once installed an oil burning apparatus never returns to a furnace.

Ask Mr. Howe for a demonstration.

Clancy Ships Long Distances

With a fleet of motor trucks, some of which are large enough to nicely convey the furnishings of a seven room house, and one that will take care of an eight room house, the George M. Clancy Carting Company of 287 Webster Ave. are in a position to move store crate, and ship furniture to all sections of the country. Of course the company maintains a flock of smaller trucks from moving goods to Summer homes or for those who live in apartments.

Considerable business has been done by the firm this year and loads have been taken considerable distance outside of Rochester. In shipping goods to Chicago and other other western points, the firm has established a branch office in Chicago whereby a considerable saving is made in carting furniture to western points.

In packing and crating, this end of the business is taken care of by Mr. John Hanss formerly of the Bickford Storage Company. Hanss has had twenty-five years of experience in this line his specialty is packing wedding gifts and china ware. A telephone call will bring a man to estimate the cost for carting your furniture, and will also tell you the cost for shipping.

Two floors of the ware house are reserved for storage facilities. The building is a fireproof structure and has accommodations for about twenty loads of furniture.

Girls Build Fortune in Oklahoma Desert

Cooley, Okla.—Packing their dunnage and crossing the plains of Kansas in a covered wagon to their new home in the wilds of Oklahoma, Miss Beatrice Cooley and Emma Blampied, both of Hutchinson, Kan., 20 years ago took up what seemed a worthless claim to conquer their world of dreams.

The two women, in a country pillaged by outlaws, courageously built a store and post office in connection with their home on a little claim where the roads crossed and named it Cooley, Okla. One girl would care for the trade while other sat behind a curtain, rifle on her knee, prepared for invaders.

Through hard work and their undying spirit the girls converted a portion of that cattle ranch into rich acres of orchard, vineyard, chicken run and sweet clover

Wearing overalls, doing all their own work, Miss Cooley, whom the town is named after, and Miss Blampied have conquered their dreams.

Opal Diggers Work Hard for Small Remuneration

Of all the rough "outback" jobs in Australia, digging for opal is about the worst. Coober Pedy lies in the heart of the Stewart range, 170 miles from the nearest station on the East-West railway, and its whole population of between 70 and 80 diggers lives underground in burrows scratched out of the hillside. A tin shanty, in which the diggers keep their tools, is the only sign of life showing above ground.

Every morning the diggers come out of their holes and set out for the opal fields, to cut patiently through the rock in the hope of finding the beautiful black diamonds lying beneath. Between them they have dug many thousands of dollars' worth of opal in the last four years, though they have worked only a small area of a field said to be 40 miles long. In normal times opal is worth about $15 an ounce, but now that there is practically no demand for the gems the diggers have opal, but no money.
