Parish Educational Business Bulletin

Go to the

Rochester Business Institute

for a thorough business training. The training that has placed thousands in responsible positions in the business world.

172 CLINTON AVENUE, SOUTH

HAVE YOU HAD YOUR SPRINGS INSPECTED YET?

You'll never realize what "Perfection" Spring Service is until you've tried it. If you can't spare your car during the day we'll do the work at night.
Springs need looking over once a year at least, particularly after the bad weather of winter and spring. Attention now means comfort and safety thru the season. Drive in. No good putting it off.

Handles the Hadol Prepartions made in the City.

The Wm. Yalowich Drug Company at 688 Hudson Ave, manufacture and sell the celebrated Hadol preparations. As these products are made and sold by the same company it is possible for them to use only the best and purest drugs and to oversee the manufacture of them. This guarantees the user of the fact that these preparations are pure and it also lowers the price as it eliminates the middle man.

The Hadol Cough Balsam is the best of medicine for those stubborn coughs and colds. Try some of this and you will want to try all of the Hadol remedies as they are the best of their kind.

The Yalowich Drug Company also make a speciality of its prescription department with a licensed man at the helm with one man doing this work and using the double checking system it is practically impossible for a mistake to be made. As this company has been in business for sixteen years at the same address it stands to reason that they are very reliable in all their lines. Drop in and see if they can't give you a cure for that disorder or affliction.

Radio Owners will be Interested.

Are you planning to install a Radio outfit in your Summer place at the shore or lake this season? If you are, consider the prices and quality of the sets you are able to procure at the I. S. Hunt Company's Store at 390 Thurston Rd.

Now that such wonderful concerts are being broadcasted almost nightly at the Eastman, we feel sure that nearly all our readers are interested in this new fad. Mr. Hunt carries the Atwater-Kemp make of Radio set, and you are able to obtain a complete set at the special price of $95.50, this price includes the storage battery. The Hunt Company also carry a complete line of electric supplies of all kinds.

Now that every one is cleaning up and painting up for summer, you will be interested to know that you can obtain the celebrated Monarch paints at this store and they have a large supply to choose from, and they also carry builders' hardware.

The Hunt Company have the exclusive agency in Rochester for the Harriet Dalmage home-made candies. These candies are made in the city and are the purest kind, if you have never tried them, do, and you will always buy them.

CHAFF

A good cause makes a strong arm.

Stiff opinion is usually in the wrong.

Many a strong man is paid a weekly salary.

Better to consider what you can do than whom.

A man's good opinion of himself is the real thing.

And the softer the road the harder it is to travel.

Wise men settle their quarrels before they are begun.

A gossip that tells the truth does the most damage.

Beautiful Summer Hats

Clever Summer Hats are on display now at Rochester's up-to-date millinery store-McGarveys-298 Main Street East, you will find this directly opposite East Ave. The best thing about these new summer Hats is the price. The prices are pleasing reasonable.

The colors this season are especially brilliant as is shown in the silk and crepe hats, added to the gayness of the hats themselves are the beautiful embroidery color masses which also glint with metalic threads and touches.

The showing of the all black hats is especially good and attractive and they have a new full line of sport hats. As the hot days approach you will be thinking of getting a white silk, crepe, straw, or transparent hat to go with that summer wash dress, or dress up-dress. Come in and see the large variety we have to choose from. You will find a visit to this smart shop a pleasure, and a delight. The service here is the very best you will find in the city the youg lady clerks are especially suited and chosen for their positions. This phase of shopping always appeals to the select clientele of McGarveys.

Your Telephone Can Sing.

Did you know it is possible to play a tune on an ordinary telephone receiver? asks London Tit-Bits.

The musical telephone works in the same way as the usual speaking instrument. When you talk into a telephone your voice moves a little disk which alters the power of an electric current, thus moving a duplicate disk at the other end of the line. This second disk translates the electric wave back into human language.

In the musical telephone, instead of talking into a mouthpiece, various buttons are pressed which alter the electric current in the same way that your voice does. This causes the disk in the receiver to move up and down. In this way various notes are produced, and if the apparatus can be varied sufficiently, whole tunes may be played.

Experiments have shown that electric lights can be played in the same way. A big arc lamp has been made to play "God Save the King."

Galluses.

In addition to being the food producer, political balance wheel, and all the other things the farmer does and is for the country, it looks as if he would have to protect and maintain the great American institution of suspenders.

The cities and towns have passed them up entirely, and pin their faith to the relatively untrustworthy belt. They are even making the jest that a pessimist is a man who wears suspenders as well as his belt.

Let us rally around, or under, or inside of, as the case may be, the American gallus. No other device is so scientific, so reliable, so comforting. No other will stand such punishment and still function smoothly and efficiently, down to the last two buttons of 10-penny nails.—Farm Journal.

For Handling Coil Stock.

The loading and unloading of heavy coils of wire or rod-stock, never a simple proposition, is expeditiously effected by means of a novel conveyor developed by a Wickliffe (O.) concern for use with its electric tramrail system. The coil conveyor is in the form of a steel hook about eight feet long and will carry a ton of rod-stock at a time. In conjunction with electric hoists it makes the loading and unloading of this sort of metal cheap and easy.—Scientific American.

The Too Social Microbe.

"They have succeeded in isolating the grip germ."

"Yes," answered Farmer Corntossel. "They can isolate him once in a while, but there ain't no way to make him keep to himself."

The speeder may not know where he is going, but the traffic cop does
