If we could say a prayer with pictures...

no words could say our prayer as well as the small face of two-year-old Mary Beth Pyron.

This lovely child — shown here with her mother — was born with a crippling defect of the spine. She is one of the 250,000 American babies born each year with congenital malformations. Think of it — one out of every 16 American babies!

Through the March of Dimes, you helped science find the way to stop crippling by polio.

Now the NEW March of Dimes will help science find the way to stop crippling birth defects — the tragedy no one has wanted to face!

By giving to the NEW March of Dimes you can help save America's children from birth defects, just as they are being saved today from crippling by polio.
