THE FXILE'S RETURN.

Thousands Welcome Rechefort Back & His Home In Paris.

PABIS. Fob. 4.-M. Henri Rochefort, ed. itor-in-chief of the Socialistic Republican journal L'Intransigeant, who returns to France under the act of amnesty adopted last week after

having been in extle since 1889, has arrived in Paris. The staff of L'intransige ant joined M Rochefort at Amiens, 84 miles north of Paris. where a crowd had gathered in the rallway station to welcome the wellknown

journalist. Roch-HENRI ROCHEFORT. efort was heart ily cheered. He made a brief address without leaving the train.

The public was not allowed to enter the Gare du Nord in this city, but on the arrival of the train on which M. Rochefort was travelling, the pressure became so great that the growd broke down the barriers and invaded the station shouting, "Vive Rechefort!" "Vive le Prescript!"

M. Rochefort and his friends had the atmost difficulty in reaching their carriagos. There were fully 50,000 persons gathered about the station. The greatest good bumor was displayed and frantio obcoring was indulged in.

Will of James O. Pair Stolen.

SAN FRANCISCO, Jan. 80.—The will of the late James U. Fair was stolen from the clerk's office and there is not the slightest clue to the perpetrators of the crime. A will filed for probate is a pub-He document, and like all papers in sivil actions and probate proceedings is supposed to be open for the inspection of anyone who is interested in the case and desires to see it. The clerk who was asked to produce the will went to the pigeon hole where it had been last placed. He took the bulky envelope, on which was inscribed: "Last will and testament of James G Fair" When he opened it the precious document was not there. In its place was a lot of worthless paper.

AN OCEAN HORROR.

THE BIG LINER ELBE GOES TO THE BOTTOM.

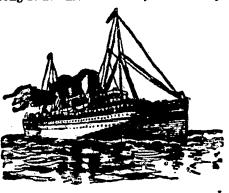

Of 250 Souls Abourd, Only a Score Escape Survivors In an Open Hoat Picked Up by a Fishing Smack Off the Boglish Coast -The Disaster Caused by

LONDON, Jan. 81.—The North German Lloyd steamer Elbe, Captain Gossei, from Bremen Tuesday for New York via Southimpton, has been sunk in collision with he British steamer Crathle, bound from Rotterdam for Aberdsen.

The first intimation of the disaster came | various brands or makes of paper. rom Lowestoft, Suffolk, one of the chief! English fishing ports. Late in the afternoon a dispatch was received from that, of the industry is that of the famous pleas saying that it was reported there that a trans-Atlantic steamer had been sunk in the North sea, and that the loss of life was very great. The first dispatches stated that there had been 850 persons on the Elbe, and that only 19 had number of men, famous at that time for been savid, the rescued having been landed at Lowestoft by fishing smocks.

graph company and to Lloyds confirmed authenticity of the manuscripts. To this the report of the less of the steamer and document these men attixed their signastill later it was learned that the Crathie, the steamer that sunk the Elbe, had put into Monetule, Holland, in a domaged condition. She reported that she had been in collision with an unknown ocean steamer.

From the details now at hand, it learned that the Elbo was proceeding along at her usual rate of speed and keep.

THE ELBE.

dark, but there was no gale. Suddenly to the officer on the deck that the lights of a steamer were close aboard over the port

Before the course of the Kibe could be changed so as to sheer her off from the approaching steamer, the latter struck her, contained. just about the engine room, going through her plates as though they were paste with that commodity, nor did I fear board and sticking her nose almost completely through the hull of the Libe. For a time the Crathie held the Elbe on her nose, but then her engines were re-

versed and she backed out of the aperture she had made. As she did so the water rushed into the Elbe in a torrent and she since the period of Elizabeth, and being began to immediately settle. The officer in charge of the ship at once

hurried orders to clear away the lifeboats for launching. Three of the boats were had no mark whatever. cleared and swung out and lowered, but the steamer capsized and it is thought that the appearance of such marks on that all of its occupants were drowned.

as the Crathie backed away from the Elbe every remark that was made on the subthe in-rushing water flooded the steamer ject, and I at length gleaned the intelliaft of the engine room so quickly that nobody below decks in that part of the ship had an opportunity to escape. The shock of the collision was comparatively slight in view of the damage done, but this is explained by the fact that it was a direct session, and having selected such as had butting blow. Nearly all the passengers the jug on them I produced the succeed. were as leep at the time, but many of them ing manuscripts upon these, being carewere awakened by the shock, slight though it was. They could hear the rush of the rapidly inflowing water and with cries of terror sought to make their way to the upper deck. The steamer being loaded by the stern, the water naturally rushed aft, and this allowed many of the most conversant with the manuscripts.' passengers forward to reach the deck.

In the case of the saloon passengers, however, the result was fatal. As they rushed from their staterooms into the saloon they were met by the torrent, against which it was impossible for them to make paper showed by its water mark that it headway. They were caught up and swept aft toward the cockpit, where they the age of Mary. were probably drowned before the ship foundered. Altogether about 50 of the ple how water marks are made. And wildest confusion existed.

There is some disagreement among the survivors as to the number of boats that were launched. One survivor, Karl A. Hoffman, declares that only two were launched.

One of these was swamped instantly and only one of its occupants, a girl named Anna Boscker, who was bound for Southampton, was resoured. She clung to a piece of wreckage, which she grasped so ightly that it was only with difficulty that she was dragged into the second boat. She was just returning from the deathbed of her father and mother.

Meanwhile the ory was raised on the doomed vessel for the women and children to go over to the other side of the steamer away from the port side, in which was the great gaping hole caused by the Crathle. The half-fainting women and terrorstricken children hurried to the starboard side, but they had scarcely reached the boats when the huge vessel lifted her bows high in the air and then slowly and silently sank stern foremost beneath the waves, taking with her her human

Barely 20 minutes elapsed between the collision and the sinking of she steamer. A heavy sea was running and the wind, which was from the cast southeast, was bitterly cold.

THE ELBE DISASTER.

Total Number of Lives Lost Proves to Be 554

NEW YORK, Feb. 2.-A cablegram received at the local office of the North German Lloyd company, in response to in from that of other makers. quiries, announces that the name of And A very framous mark of the sixteenth tonio Fischer of Washington was correctly printed in the list of those lost.

Domingo Furrer, who was also reported lost, however, sailed on a British vessel. In addition to the passengers and crew on the Elbe there were two pilots, making a total of 354 aboard her. The pilots were notuded in the 20 saved. The total number of lost is therefore 884.

Inquiry Into the Elbe Disaster. BRENEN, Feb. 2.—The official inquiry into the foundering of the Elbe will probably be held in this city.

The charts show that at the place where the Eibe went down the water is 196 feet

STORIES OF PAPER.

HOW WATER MARKS WERE MADE AND WHY THEY CAME INTO USE.

Clever Lee Made of Them by Ireland In His Shakespearean Forgeries - Elaborate Designs Impressed by the "Dandy" Roll er-The Bogus Virgin Mary Letter.

Stories and incidents innumerable are wound up in the art of paper making, and its mechanical processes have afforded to the ingenious story teller many a chance for a thrilling tale.

This is especially true of the system of placing water marks, so called, in THZO, C. ENGERT,

Perhaps the most interesting true story which has to do with this branch 'Ireland's Confessions.

Ireland had fabricated some Shakespeare manuscripts, which for a long time were accepted as actual. They made such an impression indeed that a their crudition and for their literary standing, voluntarily prepared a testi-Later dispatches to the Exchange Tele- monial attesting absolute belief in the tures and sent the paper broadcast.

The whole of the original edition of the fakes was disposed of in a few hours, and so great was the eagerness for the edition that single copies were disposed of in anotion rooms at enormous prices.

Some time after that Ireland bimself threw these gentlemen into much sorrow by explaining just how he had had fun with them.

Ireland's story was that the sheet of paper which he used was the outside of several others on which some accounts had been kept during the reign of Charles I. At that time Ireland was wholly unacquainted with the subject of water marks.

"I carefully selected," snys he, "two half sheets not having any mark whatever, on which I penned my first effusion." A few pages further on he wrote: Being thus urged forward to the prodaction of more manuscripts, it became ing the ordinary lookouts. The night was necessary that I should possess a sufficient quantity of old paper to enable me the forward lookout on the Elbe reported to proceed, in consequence of which I applied to a bookseller, who, for the sum of 5 shillings, suffered me to take from all the folio and quarto volumes in his shop the fly leaves which they

"By this means I was amply stored any mention of the circumstances by the bookseller. As I was fully aware, from the variety of water marks which are in existence at the present day, that they must have constantly been aftered for some time wholly unacquainted with the water marks of that age, I very caresaw that the vessel was doomed and gave fully produced my first specimens of the writing on such sheets of old paper as

"Having heard it free the papers would have greatly tended to From survivors it is learned that as soon establish their validity, I listened to gence that a jug was the prevalent water mark of the reign of Elizabeth, in consequence of which I inspected all the sheets of old paper then in my posful, however, to mingle with them a certain number of blank leaves that the production on a sudden of so many water marks might not excite suspicion in the breasts of those persons who were

A traveler in Messina was once shown a letter written by the Virgin Mary with her own hand. He remarked that it must indeed be a miracle, since the was not made till some centuries after

It is the greatest mystery to most peopassengers reached the deck, where the yet the matter is the simplest thing in the world. In the manufacture of paper the pulp, before it has begun to be dried and after it has been spread on the moving platform, passes under a roller called the "dandy." On this 'dandy'' is affixed the device which works the water mark

It is of bent wire, and as the roller presses the paper it presses into it the mark.

In the same manner most elaborate designs and even pictures and intricate representations of whole battle scenes have been done from an engraved plate similar to an electrotype, used in the same manner on the 'dandy' roller.

Of course check paper and bank paper is the most important variety distinguished by water marks. In a pair of £5 note molds prepared by the old process there are 8 curved borders, 16 figures, 168 large waves and 240 letters, which had all to be separatedly secured

by the finest wire to the curved surface. There were 1,056 wires and 67,584 twists and the same repetition where the stout wires were introduced to support the under surface.

In ancient times the water marks were used for the same purposes as the old inn signs. The old inns had dolls and beehives, horses and various other forms as signs. For the same reason the paper makers bad some distinguishing mark which made their product distinct

century was the handmark—a hand topped with a star. The jug or pot mark gave the name to the "pot" paper, while the foolscap mark used on paper of a certain size gave that size its name. which it retains to this day.

The post paper was so called because it bore a mark of a shield with a post horn on it. -London Letters.

A Delicate Distinction. "Did you say you wanted Shakespeare's works?" asked the book store

"No," replied the haughty girl; "I want his plays. "-Washington Star.
