VALUABLE FIND OF GOLD

Within a Wood.

A special from Jamestown Trolumni county, Cal., gives details of a remark able find of a pocket of gold yielding within a week \$42,000 in the old Mann moth mine near Sonors, which had been renarded as worthless. A. Colby, a pio peer of Tuolumne county, and Sor Beckwith, a routh of 10, are the lucks finders of the pocket, which is not yo exhaunted. 🤫 👵

The Taurys mine recently was four chased of F. Tanay for \$400 and is no der lease to Colby and Beckwith, who pay 25 per cent of the proceeds of this mine. The latter were looked on a cranks for lessing the supposebly worthless mine. When simost discouraged ut the prospects of getting nothing for their labor, fortune smiled on them.

The Tanky is on the same lead at the Bonanua, which in early days was the richest pooket mine known, and which has a record of yielding \$350,000 in a single afternoon.

Colby at one time worked the Bonanan mine and took out many thousands. only to spend them searching for more gold, and it was by exercising knowle edge he had of the dip, angle and direction of the Bouausa mine that he was enabled to sink a shalt almost a mile from the Bonanaa and strike the same lead and another pocket of rold the value of which has not been equaled in many years. It comes, too, when most needed, as Colby had expended his last dollar in mining operations.

A special bulletin from Redding, Cal., says that authentic news has just come in from Hall-City, Trinity combty, by stage, of the discovery of an im-mense body of ore 600 feet wide and many miles in length near there. It is supposed to be the mother lode of Sierra Madre, for which miners have been searching for 80 years and from which geologists say all rich quarts and gravel of the Sierra footbills have been brought by glacial action. - Chicago Tribube.
