THE TYPOS' BANKER A SICILIAN MYSTERY PRINCESS CARINI FOUR YEARS

PRISONER IN HER OWN HOME.

Sant Op in a Closet With Mer Bilmd Daughter by Her Sloward Lover and Starved-Ouriess Light on South Italian Life-Ingonious Farinas Einsting.

Palermo, the most wideswake and important city in Sielly, has just been startled by the discovery that it was possible for two well-known women of noble family to be kept close pricesars for four years in their own palace on one of the principal streets of the town without any one knowing it. A reputable lawyer recently informed the police authorities that the Princess Carini, a member of the highest aristocracy of Sicily, was kept prisoner with her blind 20-year-old daughter in ber villa in the Via della Liberta by her steward, Giovanni Cannella. A large force of police and carbineers was sent to the villa to make sure that no one escaped; at the door the porter told them that the Princess was travelling abroad. They paged him and were stopped by Cannella's moth-

er, who told them they could not enter the house in the Princess's absence. They arrested her, broke in the doors, and after a long search found the two women in a dark closet, nearly naked, half frozen and starving. Cannella, his family and all the servants were arrested, the remarkable story of the Princess was verified, and the police are now hunting for the accomplices in the crime.

Maria La Grua, Principessa Carini, has had plenty of excitement during the course of her life. In her youth she was a noted society beauty and at 18 married the Marchese Artale di Bollalto e Sant' Onofrio. After some years of married life her husband surprised her with a lover, secured a judieial separation with the custody of his This is a first-class article and at the price whildren, but loft to her the youngest child, a little girl born blind of whom

The Princess led a fast life after that, taking one lover after another, losing her money at Monte Carlo and estranging all her relatives by open scandal; even Palermo society had to give her up. When the cholera enidemic broke out in Sicily in 1885, however, the Princess Carini volunteered as a nurse and spent months in the hospitals of Palermo tending the sick.

In 1892 her mother died, leaving her an estate that yields an income of \$10,000 a year. The Princess, by that time a middle-aged woman, fell in love with Cannella, then a clerk earning \$2 a week, and a married man, though she did not know it. She made him

daughter, occupied rooms on the ground floor of one wing of the palace, the steward, with his family, rooms in the opposite wing, and they took their meals together. Cannella then prepared his plan to obtain possession of the whole of the Princess's fortune. Little by little he removed all of the old servants and put in their places creatures of his own. He maltreated the Princess and her daughter, forbade their appearing at the windows or on the balconies, and spread the story that they had gone abroad. When he found the statement accepted by whatever persons inquired for the Princess, his usage of the women grew harsher, he deprived them of clothes, of fuel, and of food. so that they were forced to beg for bread from the gardener and

such servants as they saw from time to time. His intention was apparently to drive them mad or to kill them slowly. The unfortunate women were completely in his power. The Princess, half out of her mind, signed every paper that he directed her to sign. Cannella meanwhile lived in fine style. kept a carriage, but showed himself to be a careful administrator of the property which he intended should be his. So matters went on for four years. At last Cannella drew up a will for the Princess to sign by which everything was bequeathed to him. That roused the Princess; through all her adventures she had shown a passionate fondness for her helpless daughter, and when the will was signed, if they were not both suppressed, her child would be left at Cannella's mercy. She refused to do his bidding, and, working on the gardener's feelings, induced him to take a letter to the lawyer, who called in the police.

As this affair occurred in Sicily, the Italian newspapers attributed it to the workings of the Mafia. This seems very unlikely. Cannella's accomplices arrested so far are members of his own family and dependents of his: those sought for are the persons to whom he intrusted his stealings. The scheme, Machiavellian in its simplicity, was carried out with the strict attention to business that marks the Italian lower classes, and could have been foiled at any time had the Princess Carini roused herself to action as she did at the end.

front row, where Wallace and the young lady were seated, and as luck would have it, there was a vacant seat next to them. He slipped into it, carefully put his hat on the rack under the seat, bowed to Wallace and extended his hand. He was such a fine-looking do but introduce him to the lady. This introduction was gracefully acknowledged with a compliment, and he sat there easily talking about the play and actors. But while engaging the attention of the young lady he leaned across Wallace and, as he did so, and while stroking his moustache, he whispered:

"'Five for Jack and five for Bill.' Then he went on talking. Wallace secretly felt in his pocket got two \$5 bills and slipped them into his hands. As soon as he got the money he started as if he suddenly remembered something and said:

"'Ah! I just remember something I had forgotten and must withdraw. I hope you will pardon me for this sudden departure and that you will continue to enjoy the play,' and with a bow he went out. Next day Wallace said he would kill us if we ever sent a man after him again.

"But when his money began to run short Wallace had to hide from us. He moved into a house once occupied by John D. Ward, and we couldn't find him for several weeks. And when we did we couldn't get near him. The girl was put up to lie and say he wasn't at home. But about this time he was having trouble to find a man to dig a field of potatoes for his aunt. and one of us took advantage of it. Nine of us were in the crowd and eight of us hid behind a tool house while the ninth went to the door. He had his coat over his arm and a spade in one hand and a hoe in the other. When the girl came to the door he didn't ask Wallace was at home, but said:

"I want to see Col. Wallace about diggin' them potatoes.'

"The girl was all smiles; for she knew how much Wallace wanted them' potatoes dug, and she invited him in and called Wallace. He came downstairs, and, as he saw who it was, began to swear.

"'So you have dug me up at last, have you, and brought a spade and hoe to do it with?" "We all made a dash for the house,
