Mr. and Mrs. James Garity rejoice over the birth of a son.

Much credit is due to the A. O. H. of this city for the entertainment given by them, or at least under their auspices, on St. Patrick's night, at Howell hall. But for the efforts of these gentlemen St. Patrick's day would, in Corning differ in no way from any other day in the year. True, we might pin a sprig of "Shamreck green" upon our coat lapels or in our hat hands, and play "Garry Owen" and "St. Patrick's Day" more or less violently upon our planes and mandolins, but this way of celebrating the day is hardly adequate. It leaves something to be desired. When, however, we have an entertainment with W. F McNa. mara as speaker to twang the Irish chords of lahan and Larry Whalen so infuse into us the spirit of Irish joility and humor, then, indeed, all is well.

Shall we have base ball in Corning this summer? Of course. Teams are already being formed and captains chosen and it being St. Joseph's day, there was another names decided upon that are as various and high massat 10 o'clock, followed by bene as interesting as the ancient Grecian deities, diction of the Blessed Sacrament. Undoubtedly we shall have base ball at but shall we have a regular, big Corning 200. abother question. Let us nope that we will. In the manner of other cities Corning cannot claim to be many-We have no hand-ball alleys, our tennis courts are scarce, we do not know the game of lacrosse; with the wickets of cricket we are unacquainted-and as for snow shoes and polo sticks we cannot, some of us, imagine what they are. But base ball we know and understand and appreciate. And if that incentive to wild yelling and arm-moving and general idiocy be removed we shall sink, during the coming summer. into a state of inertness fearful to contemplate. Forbid it, cyclone. Mr. Smith, promoter of the steam heat ing project was in this city during the last week trying to impress on the aldermen. that the introduction of this plant would be a great advantage to Geneva. Mr. Smith was surprised to find so much opposition tohis plan. He claimed that, in places where the plant was used for heating purposes only, it was always successful. There has never been any necessity for tearing up the streets to repair busted pipes. One strong objection to this enterprise is the amount the city would receive for the franchise. Mr Smith declared that it would be impossible for the company to pay several thousand dollars for a franchise. The company would be willing to share the profits with the city, after it had been

established on a paving basis. He proposes to lay eight-inch pipe enclosed by heavy logs, and these in turn covered by abestos to prevent loss of heat. Pipes will be laid. from the center of the street to the curis. These pipes will be laid free of charge.
