The robins nested in the highest clump of lilac branches, where a great cluster of the delicate purple blossoms burst into bloom each May, just high enough from the ground to be out of reach. The chippies made their summer home in a shady little nook of the bush but on the side opposite to the robins' nest." "Goose-Cutting,"

Another game, that of "goose-cutting," has been added to the long list in vogue at social gatherings. The hostess provides a well-drawn outline of a goose, which is usually of red cloth, or, if made of paper, is colored red or black. This is merely for the purpose of distinctness. Two pairs of scissors are provided and a number of sheets of plain brown paper. Each gentleman invites alady to cut a goose with him and in turn these couples are seated back to back in two chairs in the centre of the room. When the model goose has been studied, the pair are blindfolded, and proceed to evolve with their scissors and sheet of paper copies of the lowl. Having finished, each paper is duly signed by its cre-Litor and laid aside. Great merriment is always aroused by the process of sutting, as the pair work in full view of the rest of the company. When finished, all the results are laid out on the parlor floor, names down, and two ludges, who have not been present at the cutting, pass upon the merits of the geese submitted and prizes reward the workers according to their merits.

A Distinguished Guest.

In the zoological garden at Breslau s one of the two shabrack tapirs known to have been born in captivity in Europe. The little animal is only t few days old. It is spotted like a fawn, but otherwise looks much like baby elephant, excepting that it isn't much larger than a good-sized cat. The mother of the rare infant came rom Farther India, where it lived in eclusion near the water. The wild apir generally sleeps during the day ind forages for food at night. It feeds on grass and other vegetable substances, and finds its long proboscis very useful in rooting in the earth for bod. A full-grown indian tapir someimes measures seven to eight feet in ength, and somewhat resembles the tog in its form and habits.

"Look Indian" For It. When you drop a small object on the floor "look Indian" and you're sure to find it. Here is the modus operandi: Somebody dropped a stickpin in the hall the other day and had hard work to find it. She hunted high and low, and on her hands and knees, and with a candle specially procured for the purpose, but it was no use. The pin was very tiny and unperceivable, its value being that of association rather than size or brilliancy. The somebody, after a final shake of the rugs, was just about to give it up forever, when one of the children chanced to come along, 'Why don't you look 'Indian' for it?" he asked. Before the somebody realized what was meant down dropped the youngster on the floor, his head and his whole body lying sidewise and just as close to the dead level as possible. In this position his eyes roved rapidly over the floor. "I have it!" he shouted presently, and, sure enough, right in the middle of the floor, in so plain a place that it had escaped notice, was the missing stickpin. The youngster then explained that "looking Ipdian" meant putting the head to the ground in order to catch sight of the smallest object between one's self and the horizon. "They do it on the plains all the time," he said. "That's why they can always tell who's coming. But It works in houses just as well as on the plains. Why, we never lose anything in the nursery nowadays; we just 'look Indian' and find it right ofí."

A Dend Leaf Observation.

Next time you are out in the park look closely at the dead leaves blowing about on the ground. You will find that most of them have their lower sides uppermost. Can you think of a reason for this?

When a leaf is mature and almost ready to fall, it curls up just a little at the edges. When it falls, the first breeze catches these margins and turns the leaf lower side uppermost, and there it remains, because in this position the wind has less opportunity to disturb it.
