HOUSE OF TROUBLE.

In the House of Too Much Trouble Lived a little boy: He was eager for a playmate, He was hungry for a toy. But 'twas always too much bothe.. Too much dirt and too much noise, For the House of Too Much Trouble Wasn't meant for little boys.

And sometimes the little fellow Left a book upon the floor, Or forgot and laughed to loudly. Or he failed to close the door. In the House of Too Much Trouble Things must be precise and trim-In the House of Too Much Trouble There was little room for him.

He must never scatter playthings, He must never romp and play: Every room must be in order And kept quiet all the day. He had never owned a pet-In the House of Too Much Trouble It is trim and quite yet. Every room is set in order-

Every book is in its place, And the lonely little fellow Wears a smile upon his face. In the House of Too Much Trouble He is silent and at rest-In the House of Too Much Trouble, With a filly on his breast. -Aibert Bigelow Paine in Munsey's.

The crew up to this time had been obedient and order was strictly enforced, because Lieutenant Bligh was an infiexible disciplinarian. For twenty-firee weeks the ship lay off Matavai, and between the seamen and the natives the greatest intimacy sprang up. Lieutenant Bligh gave presents to Otoo, chief of the district of Matavai; also liquor. to Poeeno, chief of the Otaheitans. In turn the chief sent crude articles, the handiwork of the half-civilized Otaheitans, to be given to the English monarch. After the weeks of pleasant intercourse had closed, the ship again weighed anchor to continue her jour-

On board two men were assigned to the duty of master's mates. One. Fletcher Christian, was a powerful man physically, with superabundant brute force linked to a dissolute and dare-devil nature. Christian was totally without conscience and indifferent. He was abvious to danger and without fear. After the ship had been several weeks out from Pitcairn isiand. Lieutenant Bligh had occasion to reprimand Christian. The latter was curly and resented it, but without open violation of authority, which would have meant death to the culprit. He took into his confidence Charles

Churchill, ship's corporal; John Milla, gunner's mate, and Thomas Burkitt, able-bodied seaman. These four men schemed to cast adrift on the ocean, WHO SEEMS TO THINK HIMSELF MISin a small boat, the lieutenant and all those who were loyal to him. This was a daring project, because the men had to figure on overwhelming odds Buick at Repartee, Which Has to we against them.

On April 28, 1789, Christian. who was on watch, at 3 o'clock in the morning, accompanied by his fellow conspirators, descended the hatchway to Bligh's apartment and binding him hand and foot carried him on deck. A boat was lowered to the water and the lieutenant soon followed it. The commotion resulting from this high-handed act brought sailors and officers on deck, and in a flash the men ranged themselves on opposite sides. Eighteen sailors remained loyal to the lieutenant, and these were roughly thrown overboard into the tiny craft, which was then cut loose from the big ship and cast adrift, having but five days' rations.

Young Lay, the cabin boy, was asleep in the bow of the ship a part of the time, but when he awoke and discovered what had happened he wanted to be counted among the loyal. But Christian would not let him go: he roughly pushed the boy away from the ship's side, saying: "You young brat, we want you." Bligh, though cast adrift, and in a wilderness of water, without a compass or a rudder. and with little food, was able to so guide his frail boat as to reach a safe haven. Captain Moses Brown was the originator of the idea of thus bridging Collins Pond, as it was then called In March, 1802, a charter was granted to the Salem Turnpike and Chelses. Bridge Corporation, and the bridge was completed in 1804, at a cost of \$55.409. A diver has investigated the foundations of the structure, and has found that the original bridge was made of five layers of pine laid at right angles to each other, the first two layers of pine logs hewn on one side, and the upper three of hewn timber one foot square, the whole secured together by three-inch dowels, and covered with planking 514 feet
