Protection Against the Introduction of Yellow Jack-All the Bands For Dewey -New York Will be Crowded-Vacation School Sketches

The new City Prison, better known as the Tombs, will, when completed, be the model of an up-to-date, fireproof and thoroughly complete prison. The new Blackwell's Island Penitentiary will also be constructed upon the most improved plans of prison architecture and will be virtually a palace for prisoners. The Kings County or Crow Hill Penitentiary, although of long standing, is now one of the most satisfactory institutions of ite kind in the country, while the other district prisons and workhouses have been made to meet all the requirements of good discipline and health.

The old Tombs was altogether inadequate. The new Tombs is a revelation in modern penal architecture.

The New Tombs Prison.

Vacation School Sketches.

A score of youngsters of both sexes, sitting on camp stools and diligently sketching the scenery, were to be seen in Central Park the other afternoon. They were drawing the trees, the park benches, the policemen, the squirrels -anything and everything that came to their field of vision. Some of them used water colors and others made pictures in black and white. Walking and a young woman looking over the, with evident surprise.
