She wore with this costume a toque of brown cloth with a tangle of pink bude and black and a beautiful brown boa of accordeon pleated chiffon surrounded her neck. The skirt of her gown was formed of three graduating flounces of mousseline de sole, the upper one of which formed a tunic, these flounces were clev: ly arranged so that the darker brownish shade fell over a ruched underflounce which was very scant and which was colored in a light shade on old rose, showing a bewildering change of colors as she moved across the lawn of whenever the flounces
