For some months past a successful Irish class has been taught in the schools as Chapel Hill Glenavy, and it was thought proper that it should be connected with the parent association and for that reason a meeting was held in the schools on Nov. 9. ARMAGH—At the meeting of the Kerry County Council Nov. 12, the following letter was read from Cardinal Logue:

"I beg to acknowledge with sincere thanks the extract which you have kindly sent me from the minutes of the Kerry County Council, in reference to the address of the Rt. Rev. Dr. Bunsbury, Protestant Bishop of Limerick, delivered in Tralee. The chief impression left on my mind as often as I read such utterances in the press is one of surprise at the zeal for putting their neighbor's house in order which Protestant prelates display; whereas, Catholics in religious assemblies find occupation enough in looking after their own affairs, without troubling about those of others."

Importing aliens to hold lucrative offices in Ireland is one of the baneful of the many things which British rule has hammered into the Irish people. Here is an example: A meeting of the Armagh Technical Instruction Committee was held Nov. 17 in the Tontine Buildings, Mr. R. G. McCrun presiding. The meeting was specially convened to appoint a head master for Armagh Technical School at a salary of £200 per annum and an instructress in domestic economy at £80 per annum. The fishermen of St. John's Point, while fishing mackerel in Donegal Bay lately caught a kind of fish, strangers in the waters. The fish are the American shad. Those caught by the Point fishermen were boxed and sent to the Dublin market, where they were sold as unknown fish and brought a very low price. They are three times the size of our herring and resemble the herring in appearance. The captain of a steamboat at Killybegs told the fishermen that a quantity of shad spawn was brought from the American coast a few years ago and placed in the River Shannon, and the fish were probably some of the same that had reached maturity.
