Summer is the season of health and recuperation for those who properly regulate their mode of living. For those who do not it is a season of discomfort.

Pure, healthful, light food that will not stimulate heat production while it properly nourishes and strengthens the body and brain is the great essential.

It is conceded that the best of all foods for summer diet are the quickly made flour foods—hot biscuits, rolls, puddings, cakes, muffins, etc., such as are made with baking powder. A most excellent household bread is also made with baking powder instead of yeast. These, properly made, are light, sweet, fine flavored, easily digested, nutritious and wholesome. Yeast bread should be avoided whenever possible in summer, as the yeast germ is almost certain in hot weather to ferment in the stomach and cause trouble. The Royal Baking Powder foods are unfermented and may be eaten in their most delicious state, viz., fresh and hot without fear of unpleasant results.

Alum baking powder should be avoided at all times. They make the food less digestible. When the system is relaxed by summer heat their danger is heightened.

The flour foods made with Royal Baking Powder are the same of perfection for summer diet. No decomposition takes place in their dough, the nutritive qualities of the flour are preserved and digestion is aided, which is not the case with sour yeast bread or cakes.

Furs Repaired.

There is but a short time remaining in which to have your furs repaired and new work made at summer prices. You will save about twenty-five per cent. on all the orders left with us before September 1st.
