

The Genesee Mining and Milling Co.

INCORPORATED

CAPITAL STOCK, \$1,500,000.00

Divided into 1,500,000 Shares of the Par Value of \$1.00 Each. Fully Paid and Non-Assessable

This company controls some of the most valuable mineral property of Missouri, situated in Camden and Morgan counties, and offers to investors a proposition that is second to none in this country.

Properties were located and proven by the noted geologist, James H. Amacker, of Arkansas, and are acknowledged by all who have inspected them to be among the richest deposits of the great Southwest. This company is now operating three shafts in the richest kind of zinc and lead and will be pleased to show the public some of their products if they will call at the offices. One shaft is the only true fissure vein that has ever been discovered in Missouri, and which is exceedingly rich in both zinc and lead.

For the purpose of putting the property on a dividend paying basis, the Board of Directors at a recent meeting decided to place upon the market

100,000 Shares of the Treasury Stock of the Company at 10c Per Share and

100,000 Shares at 25c Per Share

"First Come, First Served."

No better opportunity for a safe investment and sure returns has ever been offered the citizens of Rochester and vicinity.

Our proposition will stand a most rigid investigation, which we invite, and we feel confident we can convince the most skeptical.

We will pay the expenses of any person or persons, and \$5.00 per day for their services, if on investigation of the property, they find that we have made a single misstatement.

For further information, call at or address the offices of the company.
