While excavating for the foundations of a house in Ferrybank, Arklow, near the historic bridge of the town, round which the battle between the English and the Irish patriots under Father Michael Murphy was hottest in 1798.

the workmen came upon a vast quantity of human remains. They were but a little below the surface. For many years past the place has been despoiled gradually of its covering, the surroundings being a vast sand hill, which was taken away for building purposes. Many theories are advanced to account for so many skeletons, and among them one, which is the most likely, that after the battle which took place in the town the remains of the patriots were taken out in cart loads and deposited in the most convenient and handy places and this would be one of them. Then, indeed, if this can be proved the people of Ireland should hold memorial services and have a national funeral of the remains.
