THE GILLETTE SAFETY RAZOR.

A New Idea in Shaving--No Stropping or Honing.

This is the feature of the Gillette Safety Razor. By the combined processes of invention and discovery the secret of hardness and temper has finally been solved. To get a blade that does not have to be pitted with the hone and coaxed with the strop has been our aim. We have at last found it; it consists of a wafer of steel, as thin as paper, double edged, having exactly the same thickness from edge to edge. We were able to temper this thin piece of steel so hard that it must be ground with diamond dust. Every blade will give from ten to thirty velvet shaves without bother or attention. Twelve of these double edged blades go with the set, and when these are dull, send them back and we will give six new ones in exchange for the twelve you have used. You are thus assured of six to twelve month's shaving without a trace of bother about stropping or honing and without the expense of the extra stropping devices absolutely necessary with every other razor made.

All you have to do is shave. We do all the work.

Guaranteed to give a smooth, delightful shave to any face under all conditions or money back after thirty day's trial; absolute no strings to this offer.
