

**To Induce Other Unfortunates**

Geneseo, Ill., Jan., 1903.  
The Rev. Krueger pastor of St. Paul's Church in above named town, writes for the following:  
"Mrs. E. was afflicted with falling sickness about twenty-five years; physician could give her no relief and thought the disease would abate in the more mature years, but the attacks increased in time. Last summer came every day, even during the night. Last October I suggested to her to try Pastor Koenig's Nerve Tonic, but having tried so many remedies before without even relief, she thought it would be useless to try anything else. Still I persuaded her to try it. So far she took four bottles of it and is able to attend to her household again. If other unfortunates can be induced by above to try the Tonic to get relief from this awful disease I am willing to answer all letters of inquiry."

**AUBURN.**  
The mission at St. Mary's church closed last Sunday night with a sermon by Father Harney. The other two priests, Fathers Burke and MacCorry did not stay until the close for their duties called them elsewhere. Father Burke left on the Thursday before Easter for Brooklyn where he delivered a sermon Friday night, after which he left for Baltimore where he preached Easter Sunday at Cardinal Gibbons church. During the past week the mission was for the non-Catholics and each evening the church was crowded. The mission was the most successful ever held in the city.  
The young men of St. Alphonsus church gave a delightful dance and entertainment in Music Hall last Tuesday night for the benefit of the school fund. It was a success both socially and financially.

On Easter Sunday two masses were celebrated in St. Patrick's church. A great number received holy communion at early mass. The altar decorations were more elaborate than ever before, owing to a multiplicity of lights, palms, ferns, rubber plants, Easter lilies and various other plants arranged in profusion about the sanctuary. Father Dunn complimented the untiring efforts of our Sisters in beautifying the altar, and he also thanked the large number who so generously donated flowers and plants and he spoke words of praise for the excellent music furnished by the choir.  
A handsome cope and beautiful benediction veil donated a short time ago was worn for the first time on Easter Sunday at the benediction of the Blessed Sacrament which was given immediately after high mass.

Father Dougherty entertained his twin brother, Patrick, from Kendaia N. Y., this being the first time that Easter fell upon their birthday, April 23. The school collection will be taken up next Sunday.

**CITY AND COUNTRY CONDITIONS.**  
Typhoid and Malaria Are Really Country Diseases.  
While it is true that both malaria and typhoid prevail in large cities, it is none the less true that they may with a certain degree of accuracy be termed country diseases, that is to say, rather specifically, diseases of the farm and the small village. Malaria, in fact, has been called by medical men a country disease. Swampy regions do not occur in cities, or, at all events, only in the suburbs, whereas they occur commonly in the country. Open streams with side pools of still water are found in the country, and it is in such small, still pools, and in more or less permanent but small accumulations of water, that the malaria mosquito breeds. This mosquito, therefore, does not accommodate itself well to city conditions, but it is found almost everywhere in the country except possibly in very dry localities and at certain high elevations. Even in dry regions it sometimes abounds, especially where there is a definite rainy season, or where the land is irrigated. Irrigating ditches are prolific breeding places for mosquitoes, including the malaria kind. Malaria in cities, as a rule, is found only with persons who have contracted it in the country or in the suburbs, although with some cities having marshy places on their borders a malaria belt may exist, the extent of which depends upon the direction and force of the prevailing summer breezes, especially the night breezes. For example, such a condition as this accounts for the prevalence of malaria in certain portions of the city of Washington before the reclamation of the Potomac Flats, which lie to the south of the city, the prevailing night breezes of the summer being southern.
