## MORE ABOUT BLANKETS

Do you figure the tuck-in part of a blanket? One isn't much without it.

We do not like the indefinite terms 10-4, 11-4, etc., sometimes unwittingly we drop into the trade way of saying. They are meaningless, stand for nothing absolute to-day.

For example, we took our blanket that we told you of size and put it up by another's 10-4 size. Our blanket was four in. wider, had the tuck-in part that keeps you warm, the important part of a blanket.

And a further comparison would place the other blanket this store on a plane by themselves, not only in size, but in quality.

Our present terms on blankets begin at 48¢ a pair and run as high as \$25 a pair. There are some splendid values along at \$3.98, \$5 and \$5.50, on some of which there is as much of value as \$2 a pair.
