

KORNIC'S TONIC

Best Like a Brick.

11

Breakfast, 205 Marion St. 1905.

I have been suffering from nervousness since childhood. I have tried many things, but nothing has done me as much good as a bottle of Kornic's Tonic. I have been taking it for a long time, and I feel like a brick. The tonic has a wonderful effect and is well worth the price. A lady from Rochester, whose little girl was cured by the Tonic from the most violent fits, told me about it and almost begged me to try the wonderful Tonic.

Mrs. Julia F. Gorman.

Dr. F. P. Korrick writes from Greenville, Tenn.: "I had wonderful success with Kornic's Tonic in three cases of falling sickness. One bottle of the Tonic cured the worst case."

FREE A Valuable Book on Nervous Diseases and a Sample Bottle to any address. For the book and sample bottle, send a letter to the Rev. F. P. Korrick, of West Virginia, Ind., since 1875, and now by the **KORNIC MED. CO., Chicago, Ill., 100 Lake Street.** Sold by Druggists at 25 per bottle, 5 for \$1. Large Size, \$1.75, 6 bottles for \$9.

In Rochester by **J. A. Flannery, 126 N. Clinton Street.**

Our Agent

Mr. A. Herman will call on subscribers next week in Auburn.

AUBURN.

The many friends and acquaintances of Rev. C. A. Silke of this city will be pleased to hear of his appointment as rector of St. Bernard's Seminary in Rochester, but will also regret his removal from Auburn. Father Silke has for the past four years been assistant pastor at Holy Family church. He has made a number of warm friends since coming here and they will miss him very much. He is left to take up his duties this week.

The young people of St. Alphonsus church gave a reception and dance at Music Hall on Tuesday evening. The entertainment preceding the dance was given by the choir of the church. The proceeds went towards the paying off of new school house debt. The committee in charge deserve great credit for their work.

Much interest is centered on the coming election of municipal candidates for city office, but the one that is commanding the attention of the Catholic people is the run for city clerk on which two young Catholic men are pitted against one another. The peculiar thing is that both of them are from the two old parishes that of St. Mary's and the Holy Family. Edward Gullikoff is the candidate on the democratic side and Joseph Haulon on the republican side. The many friends of each are working hard for their success.

Auburn Council, Knights of Columbus, will confer the Third Degree on about 40 candidates on next Wednesday evening. The working of the degree will be held in the Curtis Annex and will be in charge of Dr. Conway, district deputy of this district. There will also be several candidates from Seneca Falls, Geneva and Waterloo who will take the degree in conjunction with the Auburn Knights.

LIMA.

The Forty Hours devotion opened here Sunday morning. The masses were at 6:30, and 9 o'clock with solemn high mass and benediction of the Blessed Sacrament Wednesday morning. The sermon Sunday evening was by Father Engelhardt of Rochester, Monday by Father Day of Mt. Morris, and Tuesday by Father Garvey of Livonia. The services were largely attended.

The funeral of Mrs. Mary Quinn took place Tuesday morning at 10 o'clock. The deceased was eighty-eight years of age.

A month's mind high mass will be celebrated Saturday morning for Ellen Hendrick.

Mrs. John Welch, who has been dangerously ill at her home, is gradually recovering.

Miss Nellie Hendrick has returned home after a visit with friends in Rochester and Penn Yan.

Miss Alice Rensland of Rochester, is spending a few days with friends in town.

MANCHESTER.

Mrs. Luther Rice, who has been ill, is recovering.

Great preparations are being made for the dance to be held Nov. 3rd in Fray's hall, by St. Dominic's Society.

Mr. Patrick McLaughlin, who for the past two years has been employed in the N.Y.C. freight house at Shortsville, has resigned his position there to accept a better one in the yard office, Manchester.

CANANDAIGUA.

Prayers were offered Sunday for John Devoys, Jr., of Clark street, and Mrs. Wm. McMahon, of Bristol road, who were dangerously ill.

Next Sunday the Sodality will receive holy communion and it is also the day for the monthly school collection.

The month's mind of Thos. P. O'Brien was observed Thursday.

General Society Wednesday evening.

A card party was held at Atwater hall on Friday evening.

Francis M. O'Brien and Mary M. Curran were married this week.

The new sanctuary lamp for which Mrs. M. D. Hogan has collected \$130, was received from Providence, R.I. The lamp is a beautiful one. Rev. James McManus, D.D., New York City; W. B. McKim, Rochester; Rev. B. Burke, Buffalo; Rev. A. Fitzsimmons, Lima; Rev. J. Walsh, Canandaigua; Rev. J. Cunningham, Livingston; Rev. J. J. Ryan, Mt. Morris.

Prayers were offered via Nickel Plate road to the West. Round trip rates to Buffalo, first and third class, from Buffalo to December 1st, 1905, are as follows: Buffalo to Buffalo, \$1.00; Buffalo to Buffalo, \$1.00; Buffalo to Buffalo, \$1.00.

GENEVA.

Rt. Rev. Bishop McQuaid confirmed two large classes here last Sunday. The sacrament was administered to about 135 children and fifteen adults at St. Francis church after the 9 o'clock mass. Very Rev. Dean McDonald and Rev. Father Dwyer assisting. At St. Stephen's church the sacrament was administered at 3:30 o'clock in the afternoon to a class of sixty.

BAKER THEATRE

Since the opening of the season of the Moore Stock Company at the Baker Theatre the plays presented up to the present time have been chosen particularly with a view to establishing a new character for the house and gaining a new following. This new policy has been successful, the new character of the theatre is firmly established and the following is an army of pleased theatregoers. "Old Heidelberg" next week's bill will undoubtedly prove one of the most interesting and popular dramatic productions ever offered in this city. Matinees on Monday, Wednesday, Thursday and Saturday.

NATIONAL THEATRE

The National Theatre announces Johnny and Emma Ray, Rochester favorites, for a three days engagement next Monday, Oct. 23rd, with matinees on Tuesday and Wednesday. The Rays are again appearing in their last season's success, "Down the Pike."

For Thursday, Friday and Saturday, Oct. 26, 27, 28, the National Theatre's offering, will be the well-known and well-liked comedian, Nat Wills, in the N. Y. success, "Mr. Duke of Duluth." The company is said to be stronger and better than ever, and the play just the kind that the National Theatre audiences like.

Weekly Church Calendar.

Sunday October 22—Gospel, St. Matt. xxi, 1-14—St. Severus, bishop.

Monday 23—St. Theodor, martyr.

Tuesday 24—St. Raphael, Archangel.

Wednesday 25—St. Margaret Mary Alacoque virgin.

Thursday 26—St. Evaristus, pope and martyr.

Friday 27—St. Frumentius, bishop and confessor.

Saturday 28—St. Simon & Jude, apostles.

How This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. F. J. CHENEY & CO., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions, and financially able to carry out any obligations made by him. Wm. D. Kinman & Marvin, Wholesale Druggists, Toledo, O.

Hall's Catarrh Cure is taken internally acting directly on the blood and mucous surfaces of the system. Testimonials sent free. Price, 75c. per bottle. Sold by all Druggists.

Take Hall's Family Pills for constipation.

Nickel Plate road again selling colonist tickets to the Pacific coast. \$42.50. Buffalo to principal points on Pacific Coast, and low rates to many other points in the far West. Tickets on sale September 15th to October 31st. For further information write R. E. Payne, general agent 291 Main St., Buffalo, N. Y.

Very low round trip rates to Pacific Coast via Nickel Plate Road. \$69.50 Buffalo to Portland, Seattle or Tacoma and return. Tickets on sale every day. At a small additional cost tickets may be routed through California. Good return limit and stopover privileges. For full particulars, sleeping car reservations, etc., write R. E. Payne, General Agent, 291 Main St., Buffalo, N. Y.

IXL Hendrick Commercial Training School, 938 Granite Building, offers a full course in shorthand and touch typewriting for thirty-five dollars to all who enroll before Sept. 15th, when we raise our prices. We are conversant with and can teach the Gross Eclectic, Gregg and the various Pitman systems, but recommend only the Pitman, the only system taught in Rochester having highest gold medal Colombian Exposition.

Lowest round trip rates to Pacific coast points via the Nickel Plate Road.

\$69.50 Buffalo to Portland, Seattle or Tacoma and return. On sale daily until September 30th. May be routed through California in one direction at slightly higher rate.

\$75.50 Buffalo to San Francisco or Los Angeles and return. Tickets on sale daily August 6th to 14th inclusive.

Good return limit and stopover privileges. Proportionate rates from points east of Buffalo. Before arranging your trip write R. E. Payne, general agent, 291 Main St., Buffalo, N. Y.

At Bacon Ridge.

The Postmistress—It's pecky little use I have for that Mrs. Styler from town.

Miss Redboot—Why, at one time you used to say she was all right.

The Postmistress—Yes, but then she used to write all her affairs on green cards. Now she writes on brown ones. I can't find out her business to know my life.

WORLD'S OLDEST INDUSTRY.

Manufacture of Gun Flints—Still Used in Africa and Asia.

Probably the oldest established business in the world is at Brandon, in Suffolk, where the manufacture of gun flints has been carried on as the successor to the prehistoric manufacture of arrow heads from the same material. It is estimated that for more than thousand years flint working has been carried on at that spot; the only change made since those early days being in the introduction of metal tools for working the flints in place of the stone and horn of the average.

Gun flints are still in use in various parts of Asia and Africa, where the possession of percussion cartridges is forbidden to the natives. The average weekly production is still 150,000, though in the days when the flint lock was the universal arm millions were turned out weekly, since Brandon is noted as producing the best flints made.

Gun flints are not the only product, however, for in Latin Europe the "strike-a-light" is still given the preference over matches, and of these about twenty thousand a week are manufactured for the Italian and Spanish trade. During the Boer war 14,000 flints were issued to the British troops and were found valuable in emergencies where the ordinary match would not have served.

The strata of flint are in five layers on Liphedge Common, a mile southeast of the village. Each miner works by himself, employing the same methods as were followed by the earlier workmen, the ground being uncovered in layers or "steps," that the dirt may be carried away without the use of windlass and buckets.

The product is sold to the chippers, who work at their homes in the village. In spite of the fact that each blow of the hammer is from a different angle and is struck with various force, the workman instinctively guides the chisel and the flakes fall into the baskets in an almost continuous stream. They are shaped with a chisel-like hammer on a block of iron and are then packed into barrels containing from 5,000 to 20,000 each.

Child Marriages in India.

More than 250,000 girls in India, 5 years of age or less, were already married when the last census was taken, and of these necessarily many have become widows. Between 5 and 10 years the number of married girls was well over 2,000,000, between 10 and 15 years it had risen to nearly 7,000,000. Of course, to the girls in the first two categories marriage meant nothing more than a contract entered into for them by others, long before they themselves were capable of understanding it; many of them had been bound by engagements when they were still children in arms; some had even been betrothed before they were born.

Most of the widows of such tender years become so before they know what widowhood means. It is only as they grow out of infancy that they learn the sad life to which they are condemned, a life of misery which is inconceivable to people of western countries, yet is enforced by Hindoo customs. It is a life of hardship, of unmerited shame, of irksome penances and of wearisome attendance at religious functions.

Though the English law in India would recognize the legality of a remarriage of these youthful widows, inexecutable custom forbids it and its occurrence is rare. There were in India in 1901 nearly 426,000 widows under 15 years of age, of which nearly 20,000 were less than 5 years old.

Measuring Eye Jumps.

We know that an eye, at ordinary reading distance, takes in about one inch of a line at a time, and that in reading a line of an ordinary book the eye makes five or six (more or less, according to the length of the line) distinct jumps. But how many know what direction the eye takes in making these jumps? And, as the movements are so very minute and rapid, how have they been studied? A very ingenious means has been employed, as follows:

A beam of light is thrown upon the corner of the eye under examination, and this beam is reflected by the cornea on to a photographic plate. As the eye moves in reading the reflected beam also moves, and upon developing the plate, which is also kept moving, a zigzag line is found. A study of such photographic tracings shows that the eye is turning back to pick up the next line have some difficulty in so doing.

The longer the line of print the greater the effort, and for this reason we may conclude that a narrow line is better for an eye than a long one, and if the line be much wider than the ordinary newspaper column there is greater effort involved.—Jewelers' Circular Weekly.

Whale Meat Instead of Beef.

Newfoundland is developing a new industry, in the form of selling whale meat in place of beef. One of the dealers says that the new meat tastes more like venison than beef, and plans are already being made to ship some to England, where it is expected that it will sell for at least 12 cents a pound.

Longest Submarine Tunnel.

The longest submarine tunnel in the world runs beneath the River Severn. The total length of it is four miles six hundred and twenty-four yards, and of this two and a quarter miles lie from forty-five feet to one hundred feet below the surface of the river already named.

A Shark's Human Prey.

On cutting open a shark, 16 feet long, caught in the Bay of Naples, some fishermen the other day found inside the monster's stomach the body of a boy of 8 years who had been missing from his home for some days.—London Chronicle.

FOOD VALUE OF BANANAS.

They Are Not, Like Some Fruits, Good Only for Their Flavor.

Professors of dietetics tell us that the banana is not, as many fruits are, a flavor and nothing more, but a food and a source of real nutriment. It is at once useful and delicious. It not only gratifies the palate, but supplies material for combustion and the maintenance of animal heat, while it also builds up the muscles and repairs the worn and threadbare nerves.

The flour made from it in its dried state is equal in nutritive value to rice, and how invigorating and sustaining rice is has been demonstrated in the recent achievements of the Japanese. Dried and sprinkled with sugar, a form in which it has been recently introduced in this country, the upstart banana is, weight for weight, as nutritious as the venerable fig.

But it is in the fresh state that the banana chiefly appeals to us. Its creamy succulence and delicate odor are inviting, and its pleasant savor is a prelude to good digestion. Dependent as that savor is in ethereal body, which the coal tar investigators have not yet been able to imitate by chemical means, it is a subtle stimulus to all subsequent elementary processes. And thus it is that the banana is an eminently digestible food. No sense of oppression or drowsiness follows a meal of it, and a meal of it may be bulky enough.—Pall Mall Gazette.

Queer Case of Graft.

The Russian press has been full of accounts of a mysterious discovery of gold on one of the trains arriving at Samara. Three large cases, supposed to contain Red Cross medical supplies, were found to be stuffed with gold and paper money to the amount of 1,000,000 roubles, which had apparently been shipped from the front. The gendarmes took the matter in hand. An investigation was ordered promptly and as promptly suppressed, apparently by high authority.

The Novosti, commenting on the incident, remarks: "That robbery of state property goes on in the far east we knew long ago. That it also exists in the west, south and north as well as in the center, we also had reason to believe; but the case under notice is interesting, because upon the first count the money amounted to a million roubles, but upon being counted by the police it amounted to about 900,000."

"Being then placed under 'control,' it had, of course, to be counted again, when it was found to be about 840,000 roubles. The arithmetic of the various departments the money passed through varied so considerably that the sum presently dwindled to 800,000 roubles. The higher authorities, having now stepped in, it is to be presumed that further countings will take place, and by the time the wealth reaches the consignee it is hardly likely to amount to double figures." Such is graft in the czar's dominions.

Mushrooms in Bricks.

The work of the plant bureau is in character almost infinitely varied. Take for example the successful experiments recently made in the growing of improved varieties of mushrooms. If you will visit the town of Columbia, Mo., you will find there a great establishment with surroundings which suggest a brickyard in full operation. It is, in fact, a brick factory, but the bricks which are stacked in huge piles out of doors, are not of clay, but of mushroom spawn—spawn, that is to say, of a superior quality, guaranteed to produce much finer mushrooms than those hitherto purchasable in the markets.

This industry is the outcome of a discovery, made by one of the plant bureau's experts, that it was practicable to introduce small bits of mushrooms into bottles of sterilized manure, and when the thread-like vegetation of the fungus had run all through the manure, to use the latter for the seeding of mushroom beds. Inasmuch as only the largest and finest mushrooms are chosen for the purpose, the spawn obtained is of a superior variety and yields mushrooms of corresponding quality. By mixing it with heaps of compost the latter is soon converted into spawn of like high grade, which, made into bricks, finds a ready market at a very remunerative price.—Outing Magazine.

Blasting with Acetylene.

A new process for using calcium carbide in blasting is described by Guédras in the Comptes Rendus. A sheet iron cylinder is used as a cartridge. It has three separate compartments—one containing calcium carbide, another water, and the third only air and an electric fuser. The cartridge is placed in the drill hole, the latter closed by a wooden plug, and the water in the cartridge then allowed, by a special device, to flow into the carbide compartment. After about five minutes, during which time the cartridge has become filled with a mixture of acetylene and air under high pressure, the electric fuse is ignited by a current, and a violent explosion results.

A Japanese Lighting Plant.

The Osaka Electric Light Co. of Osaka, Japan, a city of 800,000 people, is equipped entirely with American electrical apparatus, including six turbines, also made in Schenectady, N. Y. This company has a paid up capital of \$1,300,000 and is so progressive that it is on a par with some of the best American electric lighting companies.

Wood for Penolls.

The amount of wood which is used every year for the manufacture of pencils is almost incredible. Nearly 4,000 acres of cedar trees are cut down annually for this purpose alone, and of these 2,000 acres are in Florida. In Bavaria alone there are some forty pencil factories.

J. H. MOORE'S ROCHESTER THEATRES.

J. H. Moore, Manager. W. B. McCallum, Local Mgr.

COOK OPERA HOUSE

"The House of Good Cheer."

Presenting Fashionable Vaudeville

Week Beginning October 23rd

Laesky and Rolfe's

CHINA RICH IN IRON ORE.

Control of the Field a Feature in the Russo-Japanese War.

We know much less of the iron resources of the other continents than of Europe and America. The only other known field in any of them which promises a yield of general importance is that in China, where over a wide area there is evidence of iron ores along with good coal for smelting, and under conditions of climate and of labor which promise a cheaper product than has been obtained in any other district.

This combination of resources is one of the several features which give the present struggle between Japan and Russia a world-wide meaning, for in their control depends in large measure the economic mastery of the Pacific ocean. They are very soon to make China the manufacturing center of that realm. If Russia commanded the mineral stores of that kingdom she might find her way to master the world even more effectively than Rome did in her time.—International Quarterly.

Origin of the Guinea.

The guinea was first coined in Charles II.'s reign, together with the five guineas, two guineas
