JOHN M. REDDINGTON, Lehigh Valley COAL. Highest, Cleanest, Best. Telephone 39.

Against Daily Naps. Prolonged "forty winks" during the day are severely condemned by many doctors on the ground that they affect one's regular sleep. Scientists have found that in the ordinary course in the human being there is the greatest vitality between 10 a. m. and 2 p. m., and the least between 2 o'clock and 6 o'clock in the evening. Long sleeps during the day interfere with this order of nature and sometimes affect various organs, causing headache. The nap of forty winks, but only forty, proves refreshing to many because it is too short to have any injurious consequences.

Wireless Telegraphy in France. Sportsmen in France are becoming advocates of wireless telegraphy. After carefully watching for three years a kilometer's length of telegraph wire in a district not overpopulated with birds an observer has proved that one and a half head of game, such as partridges, pheasants, quail and so on, are impaled yearly on every wire of this length in France, which means a total all over the country of 40,000 annually. Many of the victims, especially of the migratory kind, lose their lives through nocturnal flights.

Brains of Great Men. Brains of great men vary very much. It is found that men of encyclopedic mind have large and heavy brains—Gladstone had to wear a very big hat—with an enormous bed of gray matter and numerous convolutions, on the other hand, men whose genius is concentrated upon one line of thought are of small brain and, consequently, have small heads. Newton, Byron and Cromwell were in this class.

Silk Production in Switzerland. Few people probably suspect the extent to which Switzerland figures among the silk-producing countries of the world, which so far as Europe is concerned, have always been supposed to be France and Italy. But Switzerland exports annually silk to the value of about \$20,000,000, nearly all going to European countries.

Cable Service to Iceland. Cable dispatches may now be sent to Iceland, the cost being 12 cents a word from England. Icelandic lines, which will connect Seydisfjord, the cable point on the east coast, with all the principal towns, including the capital, Reykjavik, will soon be completed.

Paying for a Scholarship. For the last three years about 100,000 workmen, members of the Amalgamated Society of Engineers, have made three levies of one penny each to help on the work of Ruskin College at Oxford. This levy produces over £300 a year, and by means of it six engineers are maintained for a year's course of study at the college.

Courty Etiquette in Siam. By a remarkable law of royal etiquette, which has existed for a number of years at the Court of Siam, no person is permitted to sleep in an apartment situated above that occupied by the king. A deliberate breach of this rule has on more than one occasion been punished by death.

American Capital. The capital invested in American manufacturing establishments in 1904 amounted to \$12,886,265,673, according to recent figures of the Census Bureau. This shows an increase in five years of 41 per cent. The gain in the products of manufacture was 30 per cent, the 1904 aggregate being \$14,802,147,057.

Boring Tunnels Up-To-Date. Pneumatic foundations and tunnels can be carried out to a depth of 210 feet below the water surface, according to Messrs. Leonard Hill and M. Greenwood. They experimented on the effect of air pressure up to 92 pounds by means of a large cylinder, in which they stayed under different pressures for various times.

Municipal Bakeries in Italy. The failure of the municipal bakeries at Catania, Italy, is reported by Mr. Churchill, the British consul at Palermo. There was a \$30,000 deficit in the balance sheet, and the request governing a loan of \$80,000 was refused by a royal commission; in consequence the institution was closed.

Tax on Chinese. The \$500 Canadian head tax on Chinese immigrants is causing a scarcity of unskilled labor at Victoria. The British Columbia salmon cannery is petitioning for a reduced head tax, in order to permit Chinese to enter the province.

Defining the Russian. The Marquis de Custine once defined the Russian government as "an absolute monarchy tempted by assassination." The present situation is described by Constantin Wallisewski as "an anarchy tempered by a state of siege."

Eleanor Duse's Refusal. Eleanor Duse, the famous Italian actress, has positively vetoed a plan to celebrate her jubilee as was done in England and France by Ellen Terry and Bernhardt. When the subject was broached to the signora, she thanked her friends, but declined the honor.

\$25,000 As a guarantee that the story of Father John's Medicine is absolutely true, the sum of \$25,000 will be given to any charitable institution if it can bestow otherwise.

Half a century ago, when the late Father John O'Brien of Lowell, Mass. recommended to his parishioners and friends the prescription that had restored him to health and strength, the people named it Father John's Medicine. Its power to make strength and build up the body explains why it cures Colds and all Throat and Lung Troubles. Sold in 50c and \$1.00 bottles. The \$1.00 size contains three times the quantity of the 50c size.

For Surveying Great Depths. A new instrument for surveying deep-bore holes contains a compass, plummet, small camera and electric light, the whole connected with a small adjustable clock, so that the light may be turned on for a given period after the apparatus has been lowered into the hole. It has been used in surveying a number of holes in South Africa and has proved satisfactory. Both dip and deviation are recorded by means of photographs of the positions of both a plumb-bob and a magnetic needle of any desired point in the bore hole. The photographs are taken by means of two small electric lamps lighted by a time contact.

Iron Works in Sweden. Extensive projects for the establishment of iron works on the west coast of Sweden are now under consideration, but it is alleged that such works, in order to be successful, must be in a position to manufacture cheaply and compete with other produce in the market of the world. This, it is admitted, is of more importance to the new industry than either an export duty on iron or heavy customs duties on foreign produce introduced into Sweden.

The Russian Uniform. The Russian military authorities are considering the adoption of the khaki uniforms, the czar having been especially interested in one recently worn by an American army representative at St. Petersburg. The military authorities are also considering American accoutrements, including web cartridge belts and cavalry saddles, with a view to their adoption.

Tax on French Imports. The Board of United States General Appraisers has decided that goods imported from France in order to have the benefit of the reduction in duties provided for in the reciprocity treaty with that country must be shipped direct from a French port to the United States. If shipped from a port in England or in any other country they cannot have the benefit of the reduced duty.

Money Spent in New York. There is more money per capita spent in New York City every year for amusements than in any other place in the world. The people spend 12 per cent more than those in the metropolises of any other State or country, 18 per cent more than those in the next largest cities, 36 per cent more than those in smaller towns and 57 per cent more than those in the rural districts.

Habits of Animals. There are some animals which rarely drink; for instance, the llamas of Patagonia and certain gazelles of the Far East. A number of snakes, lizards and other reptiles live in places devoid of water. A bat of Western America inhabits waterless plains. In parts of Lozere, France, there are herds of cows and goats which hardly ever drink and yet produce the milk for Roquefort cheese.

Strength of Grindstones. The strength of grindstones appears from recent tests to vary widely with the degree of its wetness or dryness, stones that are dry showing tensile strengths of from 146 to 186 pounds a square inch, but after soaking overnight breaking under stress of 80 to 116 pounds a square inch.

Governor of the Transvaal. The newly appointed government tobacco expert for the Transvaal, in South Africa, has informed the Transvaal Agricultural Union that the colony can produce as good cigar, cigar and pipe tobacco as America and Cuba. He regards the industrial prospects as very bright.

The Rochester Trust & Safe Deposit Co. The Largest Trust Company in the State outside of Greater New York, located in their new building, cor. We Have Made a Rule to always give the best value for money received in anything we sell in our line of hardware, cutlery and tools. When you buy from us you get the best that is manufactured. Louis Ernst & Sons, 129 Main St. East.

SELECTIONS. A word to the unwise is superfluous. Politics has made a few men and unmade a great many. When a man shines in society he seldom shines in business. Truth is all right in its way but flattery is often more satisfactory. Money talks but that of a miser doesn't make extravagant speeches. Where there's a will there's apt to be a won't and a couple of lawyers. There is no hope for the man who can't tell the truth without lying about it. When a man is working for himself he doesn't have to employ a time-keeper. A bachelor physician says the microbes in kisses are often fatal—at least they often develop matrimonial germs. Planting Acres of Walnut Trees. Ten acres of walnut trees have just been planted in the Indiana forestry reservation by Sec. Freeman of the State Board of Forestry, which are expected to develop into valuable property. In the planting of the seeds the utmost care was taken that they would have the best chance to develop. In preparing the soil Sec. Freeman broke the ground with a sort of heavy sled made of beams, and iron, to which was attached a sharp steel prow. The walnuts were buried in sand last fall to permit the outside hull to decay, and thus facilitate the growth when the seeds were planted permanently. They are expected to be up in a short time, while had they been planted without any preparation, it would have been two years before the sprouts appeared above the surface. —Indianapolis News.
