

Special Sale of Shirt Waists

As a rule, the output of waist factories is regulated by orders. To anticipate is to speculate. Such risks are only taken by middlemen. As we said, this is the "rule." In this instance the exception is attributable to an abnormal season. After advance orders had been filled, "duplicates" or "sort-ups" were few and far between. Something had to be done. Whatever betide, hands must be kept busy. So there was no alternative to anticipation of demands. But—and there you are—you know the rest. The backward Spring was so backward—so obstinately so—that all calculations miscarried. Such was the situation to which this sale is the sequel. We have told you how manufacturers were adversely affected; now let us tell you how it may inure to your advantage:
