

TREASURES IN LACE

INVESTMENT OF £200,000 IN OUT-OF-WAY PLACE, LONDON.

Quiet Looking Place in Mayfair Street. With Little or Nothing in the Window to Indicate the Huge Stock Which Lies Within.

In an important street in Mayfair may be found a quiet looking shop, with little or nothing in the window to indicate that a huge treasure lies within.

Thirty years ago the stereoscope was to be found on a marble top table in the parlor of every well equipped home.

But like a great many other devices the stereoscope was overdone, and soon they were laid away in garret and storeroom to be viewed by after generations as relics of times gone.

The stereoscope has been rejuvenated by an inventor who has hit upon the idea of the modern moving picture.

The pictures for this apparatus are made by a stereoscopic camera—that is in pairs, side by side, and the prints thus made are mounted on a barrel and placed in a cylindrical box on the stereoscope.

When boiling potatoes, and the centre of the potato refuses to soften, pour cold water in the kettle; this will retard the boiling while the centre of the potato will continue to cook.

When serving cream of celery soup, it is well while making to crisp in cold water; when the soup is ready to serve cut the celery sticks into small pieces and put into the soup; the crisp celery gives a delicious flavor.

When frying steak or chops for breakfast, and you happen to have some left over potatoes, cut the potatoes in dice, season and warm up in milk; when the meat is nearly done pour the potatoes into the spider with it; the gravy gives a delicious flavor to the creamed potatoes and makes an easily cooked breakfast dish.

When sprinkling clothes use a whisk broom; the work may be done evenly and quickly.

When smoothing rough irons and you have no wax handy, use a Uneda biscuit box; this contains sufficient wax.

When people complain that they cannot do anything with their children, that they will not mind, it is mostly the parents' fault.

The little fruit tree cannot grow strong without a stick tied to it, and cannot bring good fruit if not tended from time to time.

So how can a child turn out to be good if it has not the home training, if parents or get all about the Ten Commandment? How can they expect their children to honor them or their teachers or their employers?

The expert bridge-player's little daughter was a model Sunday-school scholar. Toward the close of the year her teacher said: "Susie, if you continue to know your lessons so well you will have a good conduct card for every Sunday in this year."

When letting out the seams of a bodice or lengthening the hem of a skirt, place the garment on a table right side up. Write a cloth out of warm water, and place over the part to be pressed, then pass a hot iron briskly both ways, then take off the cloth. This brings out the nap on the cloth and leaves no trace of a former sewing.

To remove ink readily from thin pieces of paper, or a wet towel or cloth, immediately on taking them from the water.

If washed clothes become wet with rain or the line, do not take them down, but allow them to remain until they are dry, and they will have lost none of the stiffness.

When sprinkling clothes a whisk broom is best. The clothes will be washed more evenly than by the hand.

MOVING PICTURES AT HOME.

Old Time Stereoscope and Modern Photography Walking Together.

The stereoscope, one time favorite of our grandmothers and grandfathers, has been given a new lease of life by an invention combining it with the latest development in photography, thus making the moving picture a feasible possibility.

Thirty years ago the stereoscope was to be found on a marble top table in the parlor of every well equipped home. It was the sine qua non of a perfect domestic establishment, just as at a later period the rubber plant was regarded as an essential to a happy home.

But like a great many other devices the stereoscope was overdone, and soon they were laid away in garret and storeroom to be viewed by after generations as relics of times gone.

The stereoscope has been rejuvenated by an inventor who has hit upon the idea of the modern moving picture.

The pictures for this apparatus are made by a stereoscopic camera—that is in pairs, side by side, and the prints thus made are mounted on a barrel and placed in a cylindrical box on the stereoscope.

SELECTING A HUSBAND.

Should Be Taken While Yet Young, Docile and Plastic.

Because it is the duty of every woman to marry some man, it by no means follows that she is deprived of the privilege of making acute discrimination; on the contrary to fill her mission as completely as possible, she should exercise the greatest care in selecting a mate.

Time was when she had no choice in the matter, and in some countries she has little or none to-day, but in this happily civilized land she still possesses, and will undoubtedly hold for all time the right first to choose, and then ensue. It is a noble prerogative—one, in our judgment, that should be appreciated and cherished above all others.

When boiling potatoes, and the centre of the potato refuses to soften, pour cold water in the kettle; this will retard the boiling while the centre of the potato will continue to cook.

When serving cream of celery soup, it is well while making to crisp in cold water; when the soup is ready to serve cut the celery sticks into small pieces and put into the soup; the crisp celery gives a delicious flavor.

BALLROOMS DECLINE

IT NO LONGER FIGURES PROMINENTLY IN LIFE OR ROMANCE.

Fifty Years Ago It Was Always While the Strains of a Seductive Waltz "Floated Forth" that the Heroine Ensured the Man.

Reflecting on the change of fashion as exemplified by the scenes of the modern novel, it is noticeable that the ball room has lost much of its popularity as the locale of the principal love scene.

When boiling potatoes, and the centre of the potato refuses to soften, pour cold water in the kettle; this will retard the boiling while the centre of the potato will continue to cook.

When serving cream of celery soup, it is well while making to crisp in cold water; when the soup is ready to serve cut the celery sticks into small pieces and put into the soup; the crisp celery gives a delicious flavor.

TEACHING THE BLIND.

At the Royal Normal College for the Blind, Norwood, England.

Of all the dread calamities which could befall any human being, surely loss of sight is the worst. Of all men who reserve the highest esteem of their fellow creatures, surely he deserves it who devotes his life to the welfare of those poor creatures upon whom perpetual night has fallen.

Such a man is Dr. F. J. Campbell, the principal of the Royal Normal College for the Blind at Norwood. Dr. Campbell has been blind since he was four years of age and is one of the most wonderful men living.

When boiling potatoes, and the centre of the potato refuses to soften, pour cold water in the kettle; this will retard the boiling while the centre of the potato will continue to cook.

When serving cream of celery soup, it is well while making to crisp in cold water; when the soup is ready to serve cut the celery sticks into small pieces and put into the soup; the crisp celery gives a delicious flavor.
