BETH HORTON'S DINNER

Covington regarded curiously the solitary girl at the table across the aisle. He was not alone in his curiosity...

"You must let me sit here," he said decidedly. "This is no place for a woman dining alone."

"I don't blame you for side-stepping the 'durry up' places," he said with sympathy...

"Present company always excepted," quoted Beth with a grateful glance. "It is very good of you to take me in your arms."

"I'm all right now," she said briskly. "And I'm more grateful to you than I can tell."

"How did you know?" she asked. "You are acquainted there?"

"It may be fate," he suggested lightly. "And since we are at least half way introduced, may I keep you company until train time?"

FLOATING SLUM OF CANTON

Stand beside the Imperial custom house at Canton China, and let the eye range down the river toward Hong Kong...

The Tankia (which means boat dwellers) are the denizens of these floating houses are called, form a sort of caste apart from the rest of the Cantonese...

The houses which make up these vast floating slums are of all sizes. Some are but fifteen feet long. From these cramped dimensions, however, they range up to a length of fifty or sixty feet...

There are almost no French and Italian restaurants. There are only a few hotels. The many boat-houses in Fairmount Park along the Schuylkill are built mostly of wood.

Negro children attend all the public schools and the white people send their children to private schools when they can raise the money.

The Declaration of Rights—1689—next to Magna Charta, the greatest landmark in the constitutional history of England...

"Damages!" echoed Mrs. Donovan, shrilly. "Haven't I got damages enough already, man? What I'm after is satisfaction."

Seaweed as a Water Filter. Seaweed may be planted in the Schuylkill river in Pennsylvania as an experiment to attempt to filter the water which is used for drinking purposes in Philadelphia.

HER TRANSFORMATION

"Monarchy has had quite a setback up at the House," said Captain Tracy, leaning against the door of the fish house...

"Hymeney has always been a terrible meek sort; she has had a large, wide idea of the cap's and his judgment; she's believed he was so great that when he went out the way would tip up, and that his opinions were inside information from the very keyholes of the universe."

"This is the bestest net I ever undertook to fix up," said Captain Tracy, breaking a moment's silence. The remark was clearly calculated to break the tension of the room...

"It's all right of a present they got from the old Bass property. When the estate was divided there was a bed and two chairs for Hymeney's pung and a six-foot for Jonathan, but Hymeney wasn't named in the regular will and she got only a trifling kind of a looking-glass."

"Now, did any of you ever hear any kind of a superstition as to false hair? Mary and I kind of remember something to the effect that if combings are taken from a person's hair unbeknownst to the person, that the person getting that hair, as a witch, will develop all the traits of the person that it belonged to before."

"Well, to put it plainer, the hair in that front piece belonged to Mrs. Niram Gay, and Hymeney has seemed kind of possessed of her ways ever since. She has got the cap's completely scared of blister."

"I guess you will have to say them words over again, and say 'em slow or," said Captain Ted, nudging his neighbor.

"Haw! Haw!" derisively laughed Captain Tracy as he climbed the hill. "I guess it's nothing but his soap," said the man to himself in a comforting tone.

RUIN AND DRUGS RUIN WOMEN

Result is Increase of Degeneracy Children, says Woman Head of Training School

"America for years has been in a peculiarly favorable position to observe the effects of the large cities, through the use of drugs and intoxicants, are causing an increase of degeneracy in children...

"The American woman of the future is to be a woman of health, of healthful strength and endurance. She sleeps too little and breathes too shallowly on the quiet life. She pleads and urges for headwork and brain, due to her unhygienic mode of life."

"The number of women who are suffering from degeneration is increasing. It is a sad state of affairs. We are not doing enough to help them. We are not doing enough to help them."

"The number of women who are suffering from degeneration is increasing. It is a sad state of affairs. We are not doing enough to help them. We are not doing enough to help them."
