city are not the children of the 'argely displaced by the pretty Hawealthy, who have or may have for the asking an unlimited supply of juvenile literature. They are not the children of professional men, who have the education and the mental culture of their shildren at heart. They are the children of the poorfrom the slums, in fact, whose pa-rents know nothing about literature and care less.

If this seems an extravagant statement go to any public library on any afternoon, or night for that matter, for these small readers are not hampered by many restrictions about hours or chaperonage, and watch the steady stream of children who come to take out books or to read the children's periodicals.

They are indefatigable little readers, partly because they have almost no other means of amusement and partly because they love to read

As a consequence they are much better informed than the majority of children more fortunate than they They read tales about history, mythology and science that interests them and that create a desire to learn more about various subjects, and they derive unlimited pleasure from fairy tales and story books.

The small patrons of the libraries have at their disposal the best books for children, selected by people who are authorities on the subject, and who see to it that only reall; good books that are worth reading are put on the shelves
