

AMAZING YARN OF A DEEP SEA SHIP

After Stranding on a Chinese Island During a Three Years' Voyage, Reaches Port

CREW'S WENT TO HUNT FOR ICE

The Mate and Four Sailors, After Hazardous Journey Through Jungle Reached a Settlement and Dispatched Tug to the Rescue.

Brooklyn, N. Y.—Closing a three years' voyage, which threatened to end with leaving the ship Comberstone to bleach on the rocks of Banko Island, Capt. Davis berthed his vessel in South Brooklyn late Wednesday and discharged the miscellaneous cargo of Chinese goods stowed beneath her hatch.

Everything went well until December 20, when squally weather was encountered. For two days the sea pounded along through a lumpy sea.

After an examination of the vessel and ascertaining the ship's situation, Capt. Davis decided to send a life boat for help.

Later events showed that, caught in strong currents, the ship had drifted from her course and had been drawn into a narrow channel between three islands where the swift current had dashed her on the rocks.

The mate and one man who were returned were washed overboard. The two men forward leaped out, and all four managed to fight their way to the beach.

Meanwhile those on the stranded ship were in suspense. Although in no immediate danger, there was the possibility any day of a storm coming.

Finally, on the sixth day a tug from Singapore came to their aid.

Hayward, the mate, landed on the tug going back to the ship and making another try to pull her off.
