The FINEST MOTORCYCLE in the WORLD

I mean it and am ready to prove it to you. By special arrangement with the factory I have on hand a 1911 R-S engine all taken apart. I want you to see it. If you know all about a gas engine, you will find there is more to learn. If you know nothing about a gas engine, here is a chance for you to find out just how one is made and how it works.

-The R-S people, however, have not stopped with the best engine built. They have incorporated foot rests, two brakes, free engine, perfect spring suspension, shock absorber, ball bearing magneto, both valves mechanically operated, etc., etc., even to a feltlined steel tool box with lock and key.

It could not be better built at any price. It is a winner from every point of view. For speed, for hills, for sand, for ease and perfect control in crowded streets, the R-S leads them all--without a single exception. A machine like this is bound to win out.

Mark My Word. If You Buy Refore You See the 1911 R-S You Will Be Sorry Before the Summer is Over COME AND SEE IT
