Putting an Elephant's Tooth. Perhaps the greatest dental operation on record was performed upon an elephant in the City of Mexico. The aching tooth was twelve inches long and measured fourteen inches round the root. After the animal had been securely fasten with chains his mouth was pried open and a quantity of cocaine applied to deaden the pain. When this was done a hole was bored through the tooth and an iron bar inserted. Then a rope was twisted around the bar, and four horses were attached thereto to drag the offending molar out.—London Tit-Bits.

Speak to the Horses. The human voice has more or less marked influence on all animals. In managing horses especially the voice is of the greatest use. It should be quiet and, though confident and masterful, not loud and boisterous. No one should ever touch a horse without at the same time speaking to it.—Exchange.
