A Night Shirt Proposition

There is never a time when a man cannot find a better night shirt in this Men's Fashionable Store than he can find elsewhere. Very reasonable cost. To-day, however, we say that we are offering the best value for your money in men's night shirts. Were it not for the fact that we made a very large purchase some time when the cotton market was at its lowest, than to-day, we could not offer you these very values.

You will do well to investigate them. Men's night shirts of good, substantial, generous sizes, both collarless and collared styles, with silk trimmings and double standard half dollar quality, for 50c.

Men's high grade cambric night shirts, and with attached collar, fast collar, pocket and pearl buttons, garments made for us, regular 75c value, for 50c.

Men's night shirts made of a splendid material and roomy, collarless and with attached trimmings, fine pearl buttons - also some with regular \$1 values, for 75c.

The Cost of Power ?

Having obtained their knowledge of power plant operating costs from actual study of hundreds of good, average power plants rather than from a few out-of-the-ordinary ones, our Engineers are better fortified to advise whether or not you should use central station service than are their brethren in the profession who have not had a like amount of practical experience.

These men are at your service without charge. Their advice will be just as impartial as if they had no connection with the establishment whatever.

Call them into consultation.
