Jubilee

Our Right Reverend Bishop has promulgated Pope Pius X's too few men, to the death and in-proclamation of a Papal jubilee jury of innocent people, is it not in commemoration of the grant-time to consider favorably the Church in 313 A. D. This is an important event in Church history and no one knows how the which is generally regarded as a history of the Church and the fair rate, and give decent wages Christian world was changed and to their employees?

It is fitting that such events be brought forcefully to the attention of the faithful and this the Holy Father has done in a forceful manner. While the occasion for the jubilee will be fulfilled those who make it will profit in a spiritual way and charities will benefit in a material way by the almsgiving of the jubilee participants.

The conditions to make the jubilee are easy of fulfillment. Three visits to each of the designated churches where more than one church is designated by the Bishop, prayer at each visit for the Holy Father's intention, extirpation of heresy and the replacement of error by truth and for peace between nations, giving of alms to the poor and the reception of the Sacraments. The spiritual reward for these pious practices is a plenary indulgence, which may be applied to the relief of the souls in Purgatory.

Bishop Thomas F. Hickey has designated the Cathedral and St. Joseph's as the jubilee churches in Rochester to be visited before the Feast of the Immaculate Conception, December 8th, 1913.

Right Culture

President Lowell, in his baccalaureate sermon at Harvard University took the position that to be a leader a man must not expect to be with the mass of the people.

Mayor Fitzgerald, of Boston, took distinct issue with Dr. Lowell. We incline to the opinion that the Mayor made a nice point in favor of his contention when he said that he thought it would have been better had Harvard's President advised the graduates along the lines laid down by the late John Boyle O'Reilly some years ago, when he said:—

"Put your ear down to the rich earth and listen to the vast gurgling blood of humanity, and learn whither it strives to flow, and what and where are its barriers. This is the culture worth getting, the culture that wins the love and shout of millions instead of the gush and drivel of tens. Love and hope and strength and good are all in the crowd and not in the diluted blood of aesthetic critics."

Prevention

Rochester is taking a lead in the matter of prevention of accidents, we have had a conference on the subject the past week in the course of which several instructive addresses were given and much valuable advice imparted.

According to figures compiled by the Safety Appliance Division of the Interstate Commerce Commission, the number of lives lost on railroads in the United States in twenty-four years, ended in October, 1912, reached the appalling total of 188,037. In this same period, in addition to that number being killed, there were 1,395,618 persons injured on the railroads of the United States. This is an average of 7,833 persons killed and 58,150 injured each year, or an annual total of nearly 66,000 persons killed and injured. This means that for every day during the past twenty-four years 181 persons have been killed or injured—nearly eight an hour or one every seven minutes.

The Boston Republic pertinent comments:—

"These are startling figures and should be studied by every thinking citizen of the United States. If the railroads are compelled to man their trains with too few men, to the death and injury of innocent people, is it not time to consider favorably the question of increasing their rates so that they will be enabled to earn a dividend of 6 per cent., which is generally regarded as a fair rate, and give decent wages to their employees?"

Indecency

We take pleasure in quoting two recent utterances upon the shocking tendency toward immorality and indecency in women's dress, as worn by the devotees of the ultra-fashionable styles.

Says the Catholic Standard and Times:—

It is rather startling to find in an age when women are clamoring for votes that other women are clamoring for the enforcement of an order that women who wear the new slit skirt be compelled to wear the undergarments along with the skirt. Indecency in dress has now become a public scandal. We need a Dante in this amazing age to lash its immodesty and its outrageous reversal of all the traditions of the age of chivalry and modesty.

Speaking before the Massachusetts State Federation of Women's Clubs, recently Mrs. Henry C. Mulligan said:—

"Personally, I cannot conceive what some mothers are thinking of, who permit their girls to affect the styles commonly seen upon the streets of Boston. We note young girls wearing dresses which are ordinarily associated with a totally different class of women. It is a common sight to observe girls who come from homes of refinement and culture wearing dresses so low in the neck and so tight fitting about the form as to cause men to stare and comment. Young girls, who from birth and home training should be pure in mind and modest in bearing are seen in public, wearing the costumes which differ but little from that of the women of the streets."

Even the non-Catholic world expects much from the graduates from Catholic educational institutions in 1913.

Whenever the Balkan war is renewed, the Turk will receive a final summons to move on from Europe forever and confine himself, for awhile, to Asia.

In his "Two and Two Make Four," Hon. Bird S. Coler makes the assertion that if the present teaching of Eugenics among the non-Catholics is persisted in, in one hundred and fifty years, all the world will be Catholic.

William Dean Howells rather insinuates that the prevalent passion that Spaniards are cruel, bloodthirsty and unrefined is inaccurate and may have been manufactured out of whole cloth by enemies.

NEW BELL TELEPHONE TOLL RATES

Important Announcement to Telephone Users

As announced last week, the New York Telephone Company has adopted a new schedule of telephone toll rates effective July 1, 1913.

These rates, based on the air-line distance between toll points, have been established for the purpose of making uniform rates for uniform distances in the Up-State Division. The new schedule eliminates the inequalities and discriminations in toll charges that have been the result of the varying schedules heretofore in effect, making reductions in rates to some points and increases to others.

Also on July 1st the NUMBER method of making toll calls will become generally effective. This method provides that calls to nearby toll points may be made in the same manner as local calls, i. e., by NUMBER, instead of by NAME. Telephone users have the option of calling by NAME, but a NUMBER call is more rapid and from a subscriber's telephone the rate is less.

New toll rates from Rochester to important toll points are as follows. Any rates to other points will be gladly given if you call the Toll Chief Operator.
