For the Children

John Willard, Jr., Son of a Famous Athlete.

Photo by American Press Association.

The handsome and wholesome little boy shown in the picture is John Willard, Jr., son of the famous athlete, champion prizefighter of the world, Prizefighting is a sport that is abhorred by many thinking persons, because it is regarded as brutal and has a tendency to lower those who engage in it. Boxing, however, is considered an excellent exercise and is practiced in gymnasiums and at the various colleges. Boxing is said to teach self reliance, quickness of eye and brain and when indulged in with soft gloves respects of skill only is healthful and beneficial. To become a champion requires steady nerves and great stamina as well as mighty strength. Only those succeed who live clean lives—that is, avoid the use of alcohol, tobacco and excesses of any sort. This is true of almost any undertaking. The boy who wishes to reach the top must follow the example of John Willard, Jr. He neither drinks nor smokes. Little John is only a baby yet. He is but two years of age.

Catching Monkeys.

In the Philippine Islands the natives catch monkeys in such a funny way! The monkeys are very fond of the meat of coconuts, which grow as plentifully there as apples do in our country. They are very shy, though, about going through the outer bark and will only do so when very hungry. The natives take advantage of their greed and indolence by cutting a small opening through the shell, just large enough for Mr. Monkey's leg; this hand to penetrate.

When he once gets inside he gets his hands full of delicious, dainty meat and his head is naturally wider in this act than when it entered. Finding his hand will not come out, the monkey chatters and scolds, plainly showing his indignation at the way he has been trapped, but never thinks of loosening his hold on the coconut and withdrawing his hand as easily as he put it in. There he stands, an angry monkey, until the man who set the coconut trap comes and takes him captive.

Pure Drinking Water.

There is a common belief that clean water is pure water. Boy scouts who are going out camping during the present summer should be very careful over their drinking supply. While water which looks dirty is sometimes harmless (peat coars water considerably, but does not harm it) to say great extent, danger may arise although the water is sparkling and clear.

As it is often impossible to carry a filter, scouts should always bear in mind that a very simple and effective safeguard is to boil the liquid for from 5 to 10 minutes before using it for drinking purposes.

Centuriums.

What is the difference between a funny fellow and a butcher? One deals out wit, the other wit-ties (victuals).

Why have turkeys no fear of a future state? Because they have their next world (necks) twisted in this.

Why is a deceased poor doctor like a dead duck? Because they both have done quacking.

Why was Shakespeare a good broker? Because he furnished many stock quotations.

What instrument of war does an angry lower resemble? A cross-bow (beau).

Charade.

The answer to this is one of the United States.

The first, in a great flood, sayd many. While two, just try—is part of any. The next leads always in stripes and in stars while the last two letters are half of Mars. Placed correctly together, find a state whose people are, beyond all doubt, first rate.

Answer—Ark, an, an, an—Arkansas.

THE NATION'S CAPITOL

State Department of the United States

One national subject at Washington is a beautiful and progressive building. It stands on the east side of the city, slightly east of the center of the city. The entire length of the building from north to south is 711 feet 4 inches, and its greatest dimension from east to west is 300 feet. The area covered by the building is 213,112 square feet.

The dome of the original central building was constructed of wood, and covered with copper. This was replaced by the present structure of cast-iron. It was completed in 1857. The entire weight of iron used is 2,500,000 pounds. The dome is covered by a bronze statue of Freedom, which is 10 feet 6 inches high and weighs 14,000 pounds.

The height of the dome above the base line of the east front is 267 feet 5 inches. The height from the top of the balustrade of the building is 217 feet 11 inches. The greatest diameter at the base is 125 feet 5 inches. The rotunda is 87 feet 6 inches in diameter and its height from the floor to the top of the canopy is 120 feet 3 inches.

The senate chamber is 115 feet 3 inches in length by 88 feet 3 inches in width and 36 feet in height. The galleries will accommodate 1,000 persons. The representatives' hall is 129 feet in length by 66 feet in width and 36 feet in height.—Philadelphia Press.

PLANETS AND OUR WEATHER.

Despite Popular Belief There is No Connection Between Them.

That the planets and the moon have an effect upon the weather on the earth is a common belief. This belief is based, for all changes of weather depend upon differences in temperature.

Rainfall is due to the accumulation of water in the atmosphere. This water can accumulate only by being precipitated from the surface of the earth, and evaporation requires heat. Winds also are due to heat—greater warmth in one place than in another causing the air to rush toward where the warm air is rising.

If the moon and the planets could furnish heat they might affect the weather. But the heat they furnish is so infinitesimally small that it is not enough to change the temperature an appreciable fraction of a degree. The amount of heat they shed is, as actually been measured, but it needs the most delicately sensitive of instruments to perceive it.

Another proof that neither the planets nor the moon have any effect upon our weather is that careful comparisons of the weather with the positions of the planets and the moon show that there is no relation between them. If there were we should have the same weather when the planets were in the same positions, which is not the case.—New York World.

Japan's Good Roads.

Japan is peculiarly well off in respect of good highways. The Tokaido, which runs from Kioto to Tokyo, is over 300 miles in length and, as the weather can testify, is admirably constructed. There is also the Nippondo, which is even longer and passes through some of the finest scenery in the world. The reason of Japan's excellence in the matter of roads is that in the old days, not so very long ago, the daimios, or territorial nobles, had to journey to Tokyo once a year in order to pay their respects to the sovereign. They traveled by road, with great reluctance, and if the highways were not in perfect condition, feudal justice was meted out to the daimions.—London Spectator.

Good Company.

As friends and companions, as teachers and counselors, as recorders and announcers, books are always with us and always ready to respond to our wants. We can talk them with us in our wanderings, or rather than depend on our own resources. In the lonely wilderness and the crowded city their spirit will be with us, giving a meaning to the seemingly confused movements of humanity and peopling the desert with their own bright creations.—John Alfred Langford.

Rescued by Nature.

"Were you ever lost in the woods?" "Almost."
"What rescued you?" "Nature."
"What do you mean?" "The wind was blowing so hard that the girl didn't hear me when I proposed."—London Standard.

Smoked Ceilings.

Smoke from a lamp or gas often soots a ceiling in the one particular spot while the rest remains beautifully white. It is useful to know that soiled ceilings caused by lamp and gas will be rendered less conspicuous if rubbed over with dry whitening.

Just What He Meant.

"Is the rain still keeping up?" "Why, what do you mean? I haven't seen any rain."
"That's what I asked you, if it was still keeping up?"—Exchange.

Cheep.

"Mrs. Gabby just loves to indulge in cheap talk."
"Then let her try a little conversation on the line between New-York and San Francisco."—New York Times.

Children of Today.

"If you don't give me a piece of your chocolate, Edith, I'll tell mamma that you are secretly engaged."—Eilendie Blatter (Mensch).

A SECRET SERVICE FAILURE

A Story For Men and Women
By R. A. MITCHELL

In the year 1861, I was a lieutenant in the 1st Cavalry, and I remember a certain "secret" service failure very clearly. It was a failure of the "secret" service, and it was a failure of the "secret" service.

One day the general happened to be in the camp, and I was with him. He was riding down a narrow path, and I was riding down a narrow path. He was riding down a narrow path, and I was riding down a narrow path.

I was riding down a narrow path, and I was riding down a narrow path. I was riding down a narrow path, and I was riding down a narrow path. I was riding down a narrow path, and I was riding down a narrow path.

"Oh, stop your fooling," I said, "I'll put you down."
"I didn't take me long to turn a theory of what all this meant. He was a Confederate who had got hold of a Federal officer's uniform and was using it to get on our nerves. But I didn't let on that such was my opinion."

"Oh, stop your fooling," I said, "I'll put you down."
"I didn't take me long to turn a theory of what all this meant. He was a Confederate who had got hold of a Federal officer's uniform and was using it to get on our nerves. But I didn't let on that such was my opinion."

"Oh, stop your fooling," I said, "I'll put you down."
"I didn't take me long to turn a theory of what all this meant. He was a Confederate who had got hold of a Federal officer's uniform and was using it to get on our nerves. But I didn't let on that such was my opinion."

"Oh, stop your fooling," I said, "I'll put you down."
"I didn't take me long to turn a theory of what all this meant. He was a Confederate who had got hold of a Federal officer's uniform and was using it to get on our nerves. But I didn't let on that such was my opinion."

"I didn't take me long to turn a theory of what all this meant. He was a Confederate who had got hold of a Federal officer's uniform and was using it to get on our nerves. But I didn't let on that such was my opinion."

My horse was a good one, and I was riding down a narrow path. I was riding down a narrow path, and I was riding down a narrow path. I was riding down a narrow path, and I was riding down a narrow path. I was riding down a narrow path, and I was riding down a narrow path.
