Care of the Baby In Summer

Summer Complaint Prepared by the Children's Bureau, United States Department of Labor. Most mothers have learned to regard diarrhea as one of the most distressing ailments of infancy.

Another important part of keeping the baby well is to protect him from flies and mosquitoes, which frequently carry disease about.

It is well to remember, however, that the bowel movements of a baby fed entirely at the breast are normally more frequent than those of a bottle-fed baby.

It must not be inferred, however, that the head is provided with a pad or felt inside of a series of small circular pieces and covered with a large piece held in place by means of a cap screw with a wing around it.

To Hold a Cap Screw Various methods have been employed to keep the ordinary cap screws or nuts in place, but one that can be worked without preparation or expense is as follows:

Met Spark For Motorcycle A motorcycle using a battery will give a much better spark by the following method:

Pouring Oil From Large Can Nearly all five and ten gallon cans containing oil have only the regular handle for carrying purposes.

To Sail Around the Globe The nonmagnetic yacht Carnegie started March 3 on her fourth cruise, which is expected to continue for two years.

Care of Gasoline Engines It is a good plan to flush out the crank case oil reservoir of a gasoline engine with kerosene occasionally.

A Hint For Auto Drivers The forward gear of an automobile should never be engaged with the engine until the car is practically standing still.

To Clean Sinks Coal oil will clean badly discolored enameled sinks or bathtubs and also will remove fresh paint stains.

TEN YEARS AFTER

By F. A. MASON

He and Mrs. Tom Aldrich were the first to be married in the city. They had a beautiful wedding and a happy life.

"What for?" "What is the matter with you?" "I am not!" "You are not!" "I am not!"
