How to Give Baby Fresh Air

Keep the baby out of doors. This is the advice given nowadays to parents by every wise physician.

Except in winter, begin when the baby is two weeks old to take him out for a few minutes every day in mild, pleasant weather, increasing the time gradually until he is staying out most of the time.

When the weather is very cold, on winter in the north, when the snow is melting or when there is a heavy storm in progress or a high wind blowing quantities of dust about, it will be best to give the baby his airing indoors or on a protected porch.

When the weather is excessively hot the baby should be taken out early in the day and then kept indoors until the late afternoon.

Beauty and Good Habits.

It is impossible to be beautiful without being healthy. Health is the foundation of beauty. If one wants to be really beautiful the beauty must be more than skin deep.

WHEN SORROW COMES. Life no doubt is paved with enjoyments, but we must all expect times of anxiety, of suffering, and of sorrow, and when these come it is an inestimable comfort to have some deep interest which will, at any rate to some extent, enable us to escape from ourselves and keep us from brooding.—St. John Labdock.
