Furs Superior in Quality

Furs are Advancing in Price

The unanticipated demand for furs of all kinds - and the limited supply, due to conditions caused by the war - have greatly increased the prices of practically all skins.

Next year because of small importations and the scarcity of aniline dyestuffs the prices will be still higher - so that furs purchased now will prove a good investment.

Our early, liberal purchases, when prices were even below normal, enable us to offer Quality Furs at prices considerably below the present market level.

Of course these prices can prevail only for a limited time - so an early selection should be made.
