

Report of the Condition of Lincoln National Bank OF ROCHESTER

RESOURCES table listing financial assets including Loans and discounts, U.S. Bonds, Securities, Stocks, and Real estate, totaling \$19,763,208.96.

LIABILITIES table listing financial obligations including Capital Stock, Surplus Fund, Dividends unpaid, and U.S. Deposits, totaling \$16,369,576.22.

Total deposits \$16,369,576.22. Other liabilities than those above stated None. Total \$19,763,208.96.

State of New York, County of Monroe, ss: I, Peter A. Vay, Cashier of the above named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief. PETER A. VAY, Cashier.

IN THE WORLD OF SPORT

George Lewis, Outfielder of the Boston Red Sox.

Photo by American Press Association.

George "Duffy" Lewis, the great left gardener of the Boston American League, placed his name on the baseball roll of honor by his fine work in the world's series of 1915. Duffy's performance at the bat and in the field was superb. He led all contenders at the bat in the series, hitting for a percentage of 444.

SCIENCE - INDUSTRY.

Douglas Fir Tested.

Two Douglas fir and two red cedar railway ties were recently forwarded by the forest branch of the department of lands to the Great Eastern Railway company of England, which selected two sleepers from its stock which it obtained from the Baltic and tested them all under similar conditions. The results of these tests show the superiority of Douglas fir for railroad ties.

Copper Mining in Alaska.

The mining of copper began in Alaska in 1901, and the total output of the metal to the close of 1915 was 219,913,375 pounds, valued at \$34,919,581. Of this amount, according to the statistics recently completed by Alfred H. Brooks of the United States geological survey, \$6,569,129 pounds, valued at \$13,139,129, were produced in 1915. This is more than four times the output of 1914 and by far the greatest in the history of the Alaska industry.

Air Cushion Door Check.

A very simple pneumatic check to prevent the slamming of screen doors is described in Popular Mechanics. A discarded bicycle foot pump is hinged to the casing over the door, as shown in the illustration. The hinge was made as follows: Two holes, 1/4 inch in diameter, were drilled through the air pump just above the foot plate; two ordinary screw eyes were turned into the door casing at B and two pins

were passed through the holes in the door casing at B and two pins were inserted through the holes in the door casing at C. The end of the pump rod C is flattened and a hole drilled through it to receive the pin at the top of the bracket D, which is secured firmly to the door.

Motor Races at Pike's Peak.

The American Automobile Association has sanctioned an automobile and motorcycle race up Pike's peak. The event will be staged Aug. 10, 11 and 12. The course will be thirteen miles and at the top the racers will have reached an altitude of 14,100 feet. The motorcyclists will do their racing on Aug. 10. The first prize will be the Pike's peak auto highway cup. About \$3,000 in cash prizes also will be distributed. The auto racers will race on Aug. 11 and 12. The first prize will be a \$1,200 silver cup. The victor will get \$3,000 in cash. About \$10,000 additional will be distributed among winning motorists.

Evils of Preignition.

When the carbon deposits inside the combustion chamber become heated to the glowing point by the burning of the fuel charge the compressed gases ignite before combustion is timed to take place by means of the spark. This is called preignition. The effect of this irregular explosion is a great force acting against the piston as it moves toward the cylinder head. This force against the piston is only overcome by the momentum transmitted by the heavy revolving fly-wheel. The bearings thus are subjected to a great strain, which eventually will wreck the engine.

Substitute For Pipe Wrench.

It sometimes happens that a pipe wrench is needed to turn a pipe and none is handy. A fair substitute is to break off a short piece of an old file and use it on the jaw of a flat wrench. The file will "grip" the pipe, preventing the wrench from slipping. Of course this is not equal to a good pipe wrench, but may serve to tighten or loosen a pipe or bolt when nothing else at hand will serve to do the trick.

Care of the Valve.

Anything that tends to push a valve to one side or lift it by applying force in any way except centrally is liable to cause unequal and abnormal wear of both stem and seating. For this reason the end of the stem and the top of the lifter tappet should be true and square and make perfectly even contact.

Loss of Power.

Excessive carbon deposits in the cylinders cause the piston rings to stick in their recesses, resulting in abnormal wear of pistons, piston rings and cylinders and loss of power. Deposits on the valve seats prevent the valves from seating properly, with consequent loss of power.

HELPFUL HINTS FOR HOUSEWIVES

Bumper Prevents Injury to Wall and Furniture.

A bumper has been invented to be placed on the feet of the bedstead by which both furniture and the wood work or the wall will be protected against the wear and tear occurring when the bed is moved each day in the course of making it up. The device is especially made for use on brass bedsteads, the lacquer of which becomes knocked and chafed when the bedstead is moved around. It consists of a tube with a clamping ring on one end by which it is secured to the foot of the bed. The extending portion of the tube is fitted with a plunger supplied with a protected head and held in place by a spring.

Salmon Loaf.

Drain off the liquor from a can of salmon and with a silver fork pick the fish fine, discarding the skin and bones. To the fish add a cupful of fine, soft breadcrumbs, the yolks of four eggs (beaten light), four tablespoonfuls of melted butter, half a teaspoonful of salt, a scant half teaspoonful of pepper, a teaspoonful of finely chopped parsley and, lastly, the whites of the eggs, beaten stiff. Turn the mixture into a buttered baking pan, shaping it into a loaf. Bake one-half hour. Serve with a drawn butter sauce.

Leftover Sausage.

When you have a little sausage left that is not enough for another meal try this way with it: Cut up bread into small pieces and moisten with hot water. Beat two eggs and add about four tablespoonfuls of sweet cream. Mix this with the bread and sausage, put in a pinch of salt and pepper and fry in butter. This also can be made into a loaf and baked in the oven. It is nice to eat in slices, either hot or cold. If liked, chopped onions may be mixed in.

Marlborough Fluff.

One cupful of cherries, cut very small, either canned or fresh. Stir two thoroughly beaten egg yolks into the cherries and sweeten to taste. To this add two tablespoonfuls of breadcrumbs and beat thoroughly. Now add one-half cupful of milk and the stiffly beaten whites of the eggs. Set in a dish in a pan of warm water and bake until the custard is firm; this will require about half an hour in a moderate oven. Cool and serve.

Pineapple Gelatin.

Dissolve an ounce of gelatin in half a cupful of cold water. Shred a fresh pineapple, covering it with half a cupful of sugar. Add the juice of half a lemon to the fruit. To the dissolved gelatin add a pint of boiling water and pour it over the fruit and sugar. Pour the liquid into junket glasses or other small attractive dishes, so that the gelatin need not be broken in serving. Serve with cream or pineapple juice.

Sour Milk Oatmeal Macaroons.

Two eggs, one cupful of rolled oats, two cupfuls of flour, one cupful of sugar, one cupful of butter, melted (or lard and butter mixed), one cupful of chopped raisins, one teaspoonful of soda, one teaspoonful of cinnamon, a pinch of salt and six tablespoonfuls of sour milk. Drop from a spoon on to a greased pan and bake in not too hot an oven. They grow better after they are kept.

Potatoes a la Duchesse.

Grate and mix five good sized cold boiled potatoes with five dessertspoonfuls of flour and one-half cupful of milk, adding to the mixture two well beaten eggs and a large pinch of salt. Beat together lightly and drop small spoonfuls into boiling fat the same as for doughnuts, turning them gently and taking out when a golden brown.

Laundering Skirts.

In laundering skirts made of plique, cotton or woolen it is better to pin them to the line by the waistband so that they will hang straight down. If pinned at the top they will shrink evenly all around instead of sagging, as they often do when pinned by the hem.

Pork Cake.

One cupful of chopped pork, one cupful of boiling water, poured over this, one cupful of sugar, one cupful of molasses, two cupfuls of flour, one tablespoonful of soda, one cupful of raisins and all kinds of spices to suit the taste. One egg improves it.

Monroe County Savings Bank. Organized 1856. 33-35 State St. Interest Allowed on Deposits From One Dollar Up to Three Thousand Dollars. JAMES E. BOOTH, President.

Albert H. Hatmaker. Bell Phone Chase 3265. GO TO Albert H. Hatmaker For Hardware, Paints, Oils and Glass. 1053 Main St. East Rochester, N. Y.

W. J. Wilson Machine Co. Engineers, Boiler Makers, Machinists Repairs and Supplies. 217 North Water Street. Both Phones 922.

Yale to Wear Numbers.

Yale's football executive committee has decided that the Yale players shall be numbered for the first time. Harvard alone of the big eleven has failed to order numbers for its gridiron men. The full resident coaching staff for Yale is as follows: Head coach, Theodore A. D. Jones; advisory coach, Mitchell F. Sweeney; kicking coach and scout, Dr. William Tillinghast Bull; line coach, Dr. Arthur Bridges; defensive coach, Clarence Abbott; and freshman coach, William Martin.

Originated the "Emery Ball."

Fred C. Feltberg, former big league and Federal league pitcher, has signed a contract to pitch for the Indianapolis American association team. Before joining the Federals Feltberg pitched for the Cleveland and Washington American league teams, the Toledo American association team and the Worcester Eastern league club. He is a graduate of the University of Illinois. Feltberg originated what is known as the "Emery ball."

Makes Strikeout Record.

Louis Kotula, pitcher for the Washington State School for the Deaf, struck out twenty-five batters in a game with the team of the Benson Polytechnic school of Portland, Ore., recently. His achievement is said to equal the world's record for strikeouts in a nine inning contest. A short time previously Kotula struck out eighteen in a game with the Lincoln high school of Portland.

Colonel Lowther, Stamped Steward.

Colonel Hugh Cecil Lowther, fifth earl of Lonsdale, has accepted a place on the list of honorary stewards, under whose direction the Stamped, a tournament of frontier sports, will be held at the Sheephead Bay (New York) speedway Aug. 5 to 12.
