Too Well Done. "Yes, dear," continued the newly-made husband as he gazed despondingly at the steak that was broiled almost to a crisp. "You are very charming, and you do several things uncommonly well, but you don't know how to cook a steak."

MYSTERY OF QUICKSAND.

The Real Reason For Its Treacherous Quality Is Hard to Find. Many inquirers hearing or reading of the dangerous and mysterious qualities of quicksands have sought in vain to find the difference between these and ordinary expanses of sand. Why do they engulf the unwary? An answer to this question is difficult to obtain and is generally unsatisfactory when found.

SEEING AMERICA AT LAST.

Try "Going Abroad at Home" and Learn to Know Your Country. I tried "going abroad at home" last summer. I found it well worth while and very rich in profitable returns of interest and picturesque views. One need not venture far afield to find sights of supreme interest. The American who is not thrilled by the noble buildings of our national military academy and the superb scenic background at West Point had better give up hope of being thrilled by any of the splendid sights of this grand world of ours.

THE SCOLD'S BRIDLE.

Brutal Punishment to Which Women Were Once Subjected. "The brank or scold's bridle, or gossip's bridle, was neither more nor less than a muzzle. It was in general use in Great Britain from the sixteenth to the eighteenth century, and in Scotland as well women were muzzled for certain offenses, some at least of them more imaginary than real. The instrument was real torture. Even a dog's leather muzzle is uncomfortable. How much more the scold's muzzle!

OUR "CANDY NATION."

Science Says the Sugar We Eat Is the Secret of Our Energy. America is known the world over as "the candy nation," and, according to foreigners, the average American spends the day imbibing ice cream sodas and munching bonbons. But now medical science declares that this is the secret of the energy and strenuous life of the American and that the more strenuous he becomes the more sweets he will require; that actually 7,650,000,000 pounds of sugar that is consumed yearly in the United States might be increased to the improvement of the nation.
