WATCH YOUR TIRES.

No Matter How Good They May Be This Caution is Necessary.

Many a car is sold on the representation that "the Blankmobile will run from 7,000 to 10,000 miles on a set of tires," and the motorist thus gleans the opinion that his tires need no attention for that length of time.

But no car dealer's statement or tire maker's guarantee can influence good or bad luck, and it is largely the work of the latter that places the bit of broken glass, the sharp stone or the protruding nail directly in the path of the unwary tire.

A few moments spent in examining, cleaning and plugging the cut or hole will add thousands of miles to the life of the tire.

In a few hundred or thousand miles this tread will be hanging in flapping shreds, worth no more than so much old rubber, and in order to be reclaimed the tire must be retreaded or used in connection with one of the several detachable treads on the market.

THE DEAD SEA.

Some Interesting Facts About This Curious Body of Water.

For a number of years many persons have doubted the Dead sea, in Palestine, is disappearing, but a recent careful survey by experts has established beyond all doubt that the sea is steadily increasing.

At many points on its southern and eastern borders there are vast forests with large trees becoming submerged.

The sea is about forty miles in length and ten miles wide at the broadest portion. Should it continue to enlarge it will take in valuable country, but so far as known, there is no way to prevent this.

Mediterranean waters are 1,300 feet higher than the Dead sea level, but this is no proof the waters of the Dead sea are drying up.

A survey of the wonderful region of years ago shows islands that are now gone. It is declared these are covered.

There is so much solid matter in the water that it makes about one-fifth, or 20 per cent, of the matter solid. It is so intensely salt and bitter that no creature can live in it.

The bed of the sea is rich with mineral deposits. Salts, copper, lead and zinc and marble are found in vast quantities, and experts are of the opinion there is a great deposit of petroleum beneath the vast body of water.

A man's body is lighter than the amount of water it displaces, and it is therefore impossible for a person to sink.
