Calling Telephone Numbers From Memory Causes Most "Wrong Number" Reports

It isn't always the operator's fault when your telephone is called in error.

Nine times out of ten it is because someone "took a chance" on the number he wanted--and guessed wrong.

With hundreds of telephone numbers changing every day, no memory is a match for the telephone directory.

It pays to consult the directory FIRST.

Gas Combination Ranges For Those Who Cannot Heat Their Kitchens From the Furnace or Hot Water Heating System

If you must depend upon coal heating stoves or if the furnace or other heating device is not large enough to heat the kitchen without seriously affecting other rooms, the next best thing to a Cabinet Gas Range is a "SCIENTIFIC STERLING" or "QUALITY" Combination Gas Range.

The "QUALITY" has an oven designed to use gas only.

The "SCIENTIFIC STERLING" has a convertible oven which can be used for either gas or coal and which actually works equally as well with either fuel.

Either type is a satisfactory medium for heating kitchens of average size, and either type may be had with water backs in the fire box.

"SCIENTIFIC STERLING" and "QUALITY" Combination Gas Ranges were designed to meet definite needs and we guarantee that each will give genuine satisfaction in its particular field.
