

Which Do You Prefer?

It is important for reasons of health and practical economy for every housekeeper to ask herself this question:

"Do I prefer a pure baking powder like Royal, made of cream of tartar derived from grapes, or am I willing to use a baking powder made of alum or phosphate, both derived from mineral sources?"

The names of the ingredients printed on the label show whether the kind you are now using or any brand, new or old, that may be offered is a genuine cream of tartar powder or merely a phosphate or alum compound.

Royal Baking Powder contains no alum nor phosphate.

Orchestra's Value

Being More Widely Realized This Year.

What it means to have an orchestra is becoming more generally appreciated in this city. Since the Rochester Orchestra began its career has the response been as large as this season and never has the organization come so close an approximation of its aims. For the audience that assembled at the year's opening concert last month in Convention Hall was not only of gratifying size; it was of gratifying catholicity as regards the different sections and interests of Rochester which it represented.

In no way can the gospel of musical culture be so rapidly and thoroughly spread as by means of an orchestra that is part of the life of a community. Those who have stood back of Mr. Dossenbach during the years in which he has been building his organization have watched earnestly its development and have said that they would gladly meet the directors of the orchestra's finances. It is no sympathy orchestra can be self-supporting these days is there was evidence on the part of the public that the following advantages of a big local orchestra were realized.
