THERE WAS A MAN IN OUR TOWN. Jerusalem Blooming Again Like a Rose, Says Writer

In-Letter-to-London-Times

There was a man in our town. And he was wonderful wise. He took his change in War Thrift Stamps. The Twenty-Five Cent size.

And when he found what Thrift would do. With all his might and main. He took his change in War Thrift Stamps.

Agas, agas, agas! By Gilett B. of the Vigilantes

Men Knew Male Would Do Its Part if Blacksmith Would Keep On Doing His.

The Rose of Jericho, writes a Jerusalem correspondent to the London Times, when one says it in the shops...

Scouting profit, rascally speculators went about among the more ignorant, ordinarily representing Egyptian notes...

But the good homes of Britain and of Egypt are helping things to right themselves, and trade is now being done in goods coming from Egypt...

Given to watch the Holy City revive and renew her youth.

CHEAPER POULTRY RATIONS

(Prepared by the United States Department of Agriculture.)

The demand for wheat for human consumption necessitates that it be used as economically and sparingly as possible for feeding animals and chickens.

The wheatless ration is also being tried on a pen of Buff Orpington pullets and during the past few months they have laid on an average of 111.3 eggs, a very good yield for this period.

Scratch mixture—Two pounds of cracked corn, one pound of oats. Dry Mash—Three pounds of cornmeal, one pound of beef scrap.

The scratch mixture was fed sparingly, the hens being permitted to eat about as much of it as of the dry mash. During the two-year test the hens were provided with free range where they could pick a variety of green feed.

Laying hens should have a good supply of protein, and the additional beef scrap supplies this essential to one of the cheapest forms.

Cotton seed meal used to replace half the beef scrap in the mash has given good results on the government poultry farm and has had no effect on the quality of the eggs.

The Methodist church in Japan has gained about 12 per cent in membership during the last year.

An East Concord (N. H.) farmer has been offered \$28 a bushel for his Golden Bantam seed corn.

Pay Employees to Exercise. For the last few months the office employees of a large manufacturing concern have been paid to exercise an hour a day, says Popular Mechanics Magazine.

The Trouble. "Mac" reported Mr. Laska, "where in the country have you been? I haven't seen you for a long time."

Threshing Scene in the Great Wheat Belt.

Agriculturists, threshing machine men and others with an intimate knowledge of threshing machine operations, readily admit that there is a big waste in threshing operations...

The percentage of grain which has been lost in the past by being left on the ground or in straw piles to be fed later to the animals...

The importance of having all machines in perfect shape for threshing cannot be overestimated. This includes keeping the thrasher's cylinder up to speed...

One of the problems military doctors have had to face was that when a man recovered from a wound it left him with stiff joints. To overcome this a series of simple exercises have been evolved.

How Could She Tell? One of the girls ushered in a Flatbush theater had a problem offered her the other evening. She was showing two women to their seats.
