AUTO TOURS The ideal time for a motor trip is during the month of August or early in September, and many motorists are now enroute.

To those traveling either East or West the ever popular "Motor Steamer" trip in connection with C. & B. Line steamers between Cleveland and Buffalo is very alluring. With the low round trip rate of \$7.50 and special service provided for automobilists, the tourist is quick to take advantage of the opportunity of breaking the monotony of the land journey, enjoy a comfortable night's sleep on Lake Erie, make progress of 183 miles on his journey and awake refreshed and eager to resume his auto trip early the next morning.

The Great Ship "SEEBE" or modern Steamer "CITY OF BUFFALO" leaves Cleveland daily at 8:00 p. m., arriving in Buffalo following morning at 6:30 (U. S. Central Time.)

Either one of the above steamers leaves Buffalo daily at 9:00 p. m., arriving in Cleveland the following morning at 8:00 (U. S. Eastern Time.)

This \$7.50 round trip rate is made for automobiles—127 inches wheelbase or under (over 127 inches wheelbase, \$12.00) good for return within two days. Adv.

Rev. William Cassidy Receives Commission as Army Chaplain.

Seneca Falls, Aug. 7.—Rev. William Cassidy, assistant to Rev. M. U. Dwyer, pastor of St. Patrick's Church, has received his commission as a chaplain in the U. S. Army with the rank of first lieutenant. He received the document from the office of the chaplain-general in Washington, D. C., last Saturday and with it came the orders which tell him where to begin his service. Father Cassidy has been assigned to a regiment of heavy artillery which is in training at a camp near Columbus, Ohio. He will report for service at Columbus on August 19th.

Next Sunday will be the last of his service in Seneca Falls and genuine regret is expressed by his numerous friends, but they are also pleased that he has obtained the appointment. He has greatly desired the privilege of serving as an army chaplain.

Father Cassidy came here last spring from Mount Morris. He at once took an active part in the affairs of the community in addition to his duties as assistant pastor of St. Patrick's Church and he soon had made a host of friends.

ART OF WALKING REVIVED

That More People Take Beneficial Exercise is an Indirect Result of Great War.

The human race was forgetting the art of walking. Vanity had had something to do with it—and the shoemakers, who catered to vanity. For the truth was, people were paying more attention to the style of the shoe than to the comfort of the foot. Then came the war.

Whatever else they are called upon to do, soldiers have to walk. In walking, one must have shoes that fit—shoes that do not cramp the foot, shoes with flat soles and low heels. So the armies of the world provided their soldiers with shoes in which they could walk—and the soldiers found the walking easy.

Seeing these millions of soldiers with good feet, properly shod and finding that they could walk for long distances without tiring, the rest of the world gradually came to adopt sensible shoes. In the fulness of time all of us may learn to walk, and when we do we shall find that we had for many years overlooked the most delightful process of locomotion that has as yet been invented.

Walking is the best exercise that has been devised, because it is the most natural. Man is a walking animal; the process of walking involves every nerve and muscle of the body and insures health. Men and women who walk do not suffer from any kind of disease. But the first principle of walking is a proper shoe for the foot.—Southwest American.

Building the Pyramids. In looking at pictures of the pyramids and the Sphinx everyone has wondered how these great monuments could be built in an age when there was no such thing as a steam derrick. Discussion upon the point has run through the centuries.

An English engineer has hit upon what appears to be the true explanation. His opinions are supported by the evidence of ancient inscriptions on tombs and temples. This engineer states that in building a pyramid the Egyptians constructed an inclined roadway to the level of which the work had reached.

As the pyramid grew taller the angle of the road constantly grew steeper and its length greater. Up this roadway passed all the material required in building the pyramid, hauled by slaves and pack animals.

Species of Whippoorwill. The cry of the whippoorwill is its song and only the male utters it. The female is silent. When it is singing, just as likely as not the whippoorwill is sitting on the ground, although it sings from the treetops at times. It doesn't sing after midnight. From dark until about 10 o'clock is its favorite time for singing—or yelling. In the South there is a kindred bird, somewhat larger than the Northern whippoorwill, which is sometimes called "chuck-will's-widow," because that is what some folks assert it says. And in England there is a bird very similar to the whippoorwill known as the "goat-sucker," because it is supposed to obtain its food from the milk of goats.—Exchange.

Her Prophecy Came True.

A story is told to the effect that Simon Bolivar, when he was a child of seven, had for a playmate in Spain a boy of about his own age named Ferdinand, the future Spanish King. One day, while engaged in a game of bat-tledore and shuttlecock, a stroke by young Bolivar knocked the cap from Ferdinand's head. Whereupon an old nurse, who witnessed the occurrence, and who was deemed a soothsayer, declared that some day Bolivar would knock the crown from the king's head. Which feat he certainly did accomplish, so far as South America was concerned.

Boys' Tweed Suits With TWO Pairs of Pants

We emphasize the TWO pairs because it is an acknowledged fact that a boy can get just double the wear out of a suit with an extra pair of trousers. The suit may seem a trifle higher in price at the time—but it is a great saving.

This is a good time to buy the boy his school suits because now they may be had at the old prices.

They are manly little tweeds, most of them the military models the boys are so keen for, with the Trench buckled belt so dear to a boy's heart. Plenty of good dark colors for fall wear and trousers are lined. Notice the all-wool Alpaca linings in the finer suits—they stand for long wear.

Prices range from \$8.50 to \$18.50—and this is 1-3 less than the market value of any one of these suits to-day.
