"You're a fine fellow, Bassett. Best of friends, eh?" "Thank you, surely, Pierson."

THOSE OPEN-WINDOW CRANKS

Writer Gives It as His Opinion That They Are Actuated Solely by Selfishness.

One of the most pronounced nuisances with which seasoned travelers on railroad trains have to contend is the "open-window crank."

THE OTHER FELLOW

"For an artistic provocator and rouser up of whimsical fiction, comend us to Darby Wycherly."

THE BABIES' FOOD.

We publish today the third of a series of six articles on the subject of child welfare, which deal particularly with the large number of needless deaths among infants and young children and with methods for decreasing the number of such deaths.

The year beginning April 6 (the anniversary of our entrance into the world war) has been designated by the Children's Bureau of the United States Department of Labor as the Children's Year.

The articles represent a part of the campaign which the State Department of Health is undertaking in co-operation with the Federal Government for the conservation of child life.

The Division of Child Hygiene of the State Department of Health, Albany, is ready to answer any questions on the subject of Child Welfare which may occur to our readers.

THE EDITOR.

Nature provides the proper nourishment. Mother's milk for babies, cow's milk for cows, goat's milk for goats.

When babies are raised on mother's milk they are generally strong and healthy, fat and rosy.

Every baby is a rule and a problem unto himself, but in general a baby should not have more than two ounces of milk for each pound in weight every twenty-four hours.

The feeding intervals should not be less than three hours and the quantity at each feeding in ounces about half the number of pounds in weight.

Patent foods are to be avoided. They are very expensive. Babies fed on them may look fat, but they will not keep well.

If you are interested in the right way to feed your baby send a postage stamp to the New York State Department of Health, Albany, for a copy of the booklet "Your Baby—How to Keep It Well."

BROTHER, BUY ANOTHER! It will help to pave the way for the boys who've gone beyond the Atlantic to the fray.

OUR LADY OF PERPETUAL HELP

A pretty wedding took place on Tuesday morning, Sept. 24th, 1918 at 9 o'clock, when Miss Rose Schell became the bride of Ned J. Schnorr.

The bride wore a gown of white georgette and a cap veil and carried a shower of bride's poses. The maid of honor wore white crepe de chine and the bridesmaids pink crepe de chine and carried pink asters.

Pre-nuptial events included showers by the Misses Pauline Schnorr, Teresa Schoenherr and Helen Wolfert and by the office employees of the Eastman Kodak Co., a luncheon by the members of the choir of which the bride was a member.

The funeral of Frank J. Meyer, aged 47 years, of 23 Geneva St., took place Friday morning at 9 o'clock. He leaves his wife, Rose Gleichow Meyer; one daughter, Mrs. Florence Grabenstatter; two sons, Francis of the American E. F., and Aloysius; two grandchildren. Interment was made in Holy Sepulchre cemetery.

Everything for the Horse

A Fine Line of Street and Stable Blankets at Reasonable Prices JOHN A. WEIDER 24 Spring St. Both Phones

Wm. H. Rosenbaeh

Federal Director. Lady Assistant. Phone, Bell 1431 Geessee, 412 Stone 648 Main St. West

Apache Scouts Now in France. The Apache scouts mentioned with credit by General Pershing because of their good work on the Marne are by no means green in the business.

Amusement of Airmen. Airmen off duty in France, according to Capt. William Butler of Omaha, amuse themselves in American ways.

German Bombs. German aviators in recent raids on Paris used a device like a rocket, with a clock movement, says Popular Science Monthly. The bomb on explosion releases a linen parachute equipped with a cartridge containing a substance with a maximum base.

WHERE LIBERTY BOND FUNDS GO. TWO HUNDRED DOLLAR LIBERTY BONDS WILL BUY: Five thousand rifle or machine gun cartridges, or

Another Kind of War. The warfare between man and his insect competitors is only to a small degree waged at the point of the bayonet.

What is Cowardice? However many phrases there may be of courage, bravery, valor and fear, there seems to be but one of actual cowardice. It is moral panic—an absolute destitution of courage.

"MAKE GOOD" WITH CHILDREN

Scheme of Life That is a Beautiful Thing for Both Parents and Offspring.

From year to year we find everywhere a constantly growing appreciation by parents of their responsibility. It is not the kind of responsibility really that puts blue specs on life and blurs the distant road, but is the kind of responsibility that makes a father want the companionship of his son and the mother the confidence of her daughter.

Force of Compressed Air.

The effects of air resistance are well known in the twelve and one-half mile Simpson tunnel, where an exceptionally high amount of energy is required for running the electric trains. The tunnel, which is fifteen feet wide and eighteen feet high, with a sectional area of two hundred and fifty square feet, has a ventilating current of 3,530 cubic feet of air per second, maintained by two large blast fans at the Belg end and two exhaust fans at Iselle. Trains going with this current encounter less resistance than in open air up to fifteen and a half miles an hour, but at higher speeds or in the opposite direction the resistance is much greater than outside. Consisting by gravity down the seven per one thousand maximum gradient, a train, even going with the current, cannot exceed thirty-five miles per hour on account of the braking by the air.

One Way to Get a Pass.

"Madam, if I didn't know I would tell you," said the polite commanding general to the lady asking for information to which she was not entitled. The important thing in military censorship is to know just where and when to draw the line. In our Civil War the colonel of a Pennsylvania regiment went to Secretary Stanton to ask for a pass for an old man to visit his dying son after a battle. The pass was gruffly refused. Whereupon the applicant said to the secretary, "My name is Dwight, colonel of the 149th regiment, Pennsylvania volunteers. You can dismiss me from the service if you like, but I am going to tell you here and now what I think of you," which the colonel proceeded to do in language not fit to print. He got the pass.

Fear to Leave Boats-In-Sea.

Along the troubled shores of the North sea the fishermen take anxious care of the boats in which they earn their livelihood. When the boats return from a fishing-trip which may be all night or one of many days, according to the luck of the catch—there are men and horses waiting to draw the boats safely upon the land. For the sweep of the winds across the seas are strong enough in winter, and even during the most favorable summer season, to constitute a menace to even the best-anchored boats if they were permitted to lie off the coast.
