Wisdom in Buying Gowns. It is, no doubt, an actual hardship F. for a large mass of American women to deny themselves the pleasure of a Г. constant procession of clothes at small - Q prices, but they must economize in 1. this, as in food. A cooking expert has said that there are no such garbage pails in the world as here; that the kings of Europe did not have such garbage as the factory woman in the tenement districts of this country diseards. This, it is true, has stopped; and even when garbage is plentiful, showing a spirit that is not unpatriotic but ignorant of thrift, then the government steps in and gets all sorts of things useful to the war out of the pail that once was nosed by the dogs and dumped into outer darkness.

Why Women Buy With Care. So even though the American woman may not wish to wear one good costume throughout the season, her patriotism commands her to do it. This is the kernel of the entire situation.

She buys in order that her clothes may last. She does not wish to take the time to constantly mend chenp clothes and renew them at odd moments. She

It is worth noting that velvet is the vogue for all the hours of the day and night, but it is developed in so many ways and alled to such a va riety of things that it never fails. It does not now matter half so much what hat one wears as how one wears it, and the head must fit way up into the crown and the hat must droop down-well over the eves if one would not be hopelessly out of the prevailing style.
