

SLIP-OVER BLOUSE

Device Worn With Choice of Silk or Satin Skirt.

Collarless Garment, Regardless of Becomingness, Promises to Continue Popular During Season.

The blouse shown in the sketch is one of the very smart little panel effects being developed in great numbers for the season. The blouse is a slipover. The neck is sufficiently wide to make it possible to slip the blouse very easily over the head and it is held in at the waist by a narrow elastic band, which is in turn concealed by the ribbon belt run through opening in the panel, back and front. This is very smart as a slip blouse or it may be worn with one of the lovely silk or satin skirts, the two forming a very satisfactory afternoon dress for informal occasions.

If women come to realize that the blouse which comes well below the waistline is unquestionably the smartest and most becoming, except for distinctly sport wear, the separate blouse will come into wider use.

The model sketched, as originally designed, was made of navy georgette, with banding in navy and red, the large bands used to outline the panel, neck and wrist being in a vivid red. The ribbon belt may be of navy faille or black velvet. A red belt would be striking, but not advisable, as sharply dividing the figure at the waistline is not becoming to the average figure.

The collarless blouse will almost unquestionably continue to be the most

SHIRT WITH JACKET EFFECT

This chic suit is of navy velours de laine, with collar and facings of tan. A broad girdle, loosely tied at the back, adds a new touch to the likewise new jacket with flare and peplum.

LATE FABRIC FOR LINGERIE

Voile Has Gained Place of Favor and Has an Advantage Over Satin and Silk.

Voile is a fairly new fabric for lingerie, but it has already in the few months that it has been used for undergarments, gained prestige.

To be sure, voile lingerie ten or twelve years ago would have seemed absurdly impractical. Voile was too thin, we would have said too fragile for the hard wear that lingerie must have.

But those statements would have been made in the days before lingerie had had a chance to show its good points. And they would have been made, too, in the days before we used fur and chiffon, tulle and satin for lingerie. Nowadays, of course, satin is considered one of the most durable of fabrics—one is tempted to say undergarments—in the good old-fashioned way, but undergarments are now only a part of the matter, for most of them are made of silk and satin and crepe.

Voile has one advantage over satin and silk—in the minds of some women, at least for underwear. They cling to a liking for a regular tubbing fabric for underwear. It matters not to them that satin can be washed in soap and water and ironed; satin does not seem so fresh and clean as cotton of some sort. So to them voile is a welcome addition to the fabrics from which underwear is made.

QUAINT AND PRETTY SWEATER

Short, Sleeveless Garment With Narrow Belt Assists in Solving Problem for Some Makers.

They are unobtrusively quaint and pretty, those short, sleeveless sweaters, until they start to lose their shape. That happens when the pulling begins to give, or where there is no pulling at all.

Narrow bolts of kid and new ribbon are being considered for the solution of this problem of "giving." Still neither one is especially distinctive or in keeping with the type of garment on which it is used. So a fashionable girl with a bright idea all her own left upon the plan of the narrow self-girdle. She took quite long strands of the unaccreted cotton mangle her sweater—six strands, to be exact. These she twisted round and round into some simulation of a moccasin cord. Then she weighted the ends snugly once about the sweater, then with self-compassion, tied the girdle again with graceful looseness. The effect was smart to a degree.

And this suggests other things for a clever girl to do along this line. For instance, double strands of the cotton might be loosely plaited, then weighted with long soft-tassels. That is certainly an easy thing to do, and such a practical, good-looking thing when done.

Matinee Caps. Lovely little matinee caps appear out of hardly more than a few inches of lace, ribbon and swansdown; camisolles can be evolved in no time from all kinds of odds and ends which the casual onlooker would never deem fit for the purpose. And this is no time for hesitation. Now, above all others, is the chance to buy while yet we can, so that anything of obviously good value should certainly be snapped up at sight. Quite certainly it can be put to excellent purpose and equally surely it will not soon again be available at anything resembling a reasonable price.

Darker Hair. Massaging the scalp with a very small quantity of olive oil has a tendency to make the hair darker.

SANTA FE'S PROUD POSITION

Boast is That One Must Go to New Mexico to Find the Real American Art.

The new museum of Santa Fe, which has been built through the efforts of the School of American Architecture, there has been fostered a renaissance of this ancient American architecture, one of the finest results being the Museum building on Temple of St. Francis and the Martinez. Six of the ancient structures, it is estimated, 500 years old are reproduced in the grounds, without depriving the unity of its appearance. They are: Santa Fe, San Juan, Cordova, Ingreth, Santa Ana and Pecos. The structures are built with adobe bricks of red earth, with some of the most beautiful of the Indian architectural styles. There are no exact reproductions of prehistoric structures, such as the California mission style. The mission domes of Santa Clara have been reproduced. There are clusters and, of course a path. The new museum is a gallery, part of the Museum in New Mexico, whose prehistoric archaeological and historical collections are housed in the Palace of the Governors. Here are the Santa Fe and Martinez, numbering about 40 artists of international fame.

WAS USED TO QUICK ACTION

Moving Picture Scenario Writer Accustomed to Taking Things "on the Fly" as It Were.

He had never seen her before, but he fell in love with her as she stepped from the surface car. "Come," he said, grabbing her by the arm. "We will take a taxi to the nearest policeman and be married."

While waiting for the policeman to put on a stenographic wash his hands and otherwise prepare for the ceremony, the young man telephoned to the nearest furniture store. "Hello," he said to the general manager. "Will you send me to furnish a three-room apartment for me? There is one advertised in this morning's Planet No. 2, West side, Broadway and 52nd street. Yes, it is not very far from my home. Have you anything there in ten months' place."

Eight minutes later a taxi raged through one hundred and 52nd street, and the bride and groom entered their new home.

"Doesn't this seem of a little bit sudden to you?" asked the bride as she sat down to get her breath.

"Yes, but you'll be glad to get the groom. In fact, it seems the most natural thing in the world. You see for the last five years I've done nothing but write movie picture scenarios."—Edna Fern.

HISTORIC OLD LUSITANIA

Among the historical monuments in old Lusitania, which is an ancient name of the western part of Hispania, including a part of modern Portugal, is an ancient church ruin which stands off the Rio de San Roque. It is the former Carmo Cathedral, a considerable object high above the Bay. The outer walls and piers and arches of the nave still remain. The church and cloisters retain their roofs, and in the piers an archeological museum has been established. Here many relics from ruined ecclesiastical buildings have found a refuge, among others two stone fountains in the Arabic style; one from the extinct monastery of Penha Longa, on the river of Cintra. The other was brought from Barbary after the conquest, in 1402 and given to Prince Henry the Navigator, who placed it in the Faro church as a holy water receptacle. There it had been neglected for years in the cemetery.

GOOD THAT IS EVIL SPOKEN OF

"Good is only evil spoken of because of our thoughtlessness." The woman who looked astounded at a stranger who had been shown into her parlor did not really mean to hurt the stranger's feelings by sending her away from her parlor that day with the inward resolution never again to enter his doors, but such was the effect of her lack of thought. The good is often evil spoken of because of the unnecessary harshness of our manner. It is an unfortunate excuse of offenders of this kind. I was born with an unfortunate disposition. I am brusque, and have no fineness of touch; it is hereditary. This is an attempt to dodge responsibility, to transfer the blame to our ancestors—who cannot defend themselves. Harshness of manner may be temporary but it is hardly constitutional. It is an ungracious and harmful habit and it can be cured.

INFLUENCE

The world is only just beginning to understand the extent to which individuals and nations may be and have been swayed by silent mental influence. A man prefers, of course, to believe that he is the master of his own conclusions and the arbiter of his own conduct; but let anyone ask himself how he arrived at any given conclusion or decided upon a certain line of conduct, and unless he can own to an intelligent conception of divine principle upon which he relies for guidance, he will have to admit, if he is equal to the analysis, that he has been swayed throughout his career by influences not his own.—Christian Science Monitor.

WORKS OF ART MAY BE LOST

Fear for Priceless Treasures That Were in the Famous Hermitage Gallery at Petrograd.

Believing that they were spread by the soldiers through the city, the Hermitage gallery, the Winter palace in Petrograd, has been closed since the outbreak of the Russian revolution. It is now a museum for the collection of the treasures of the city. It is now a museum for the collection of the treasures of the city. It is now a museum for the collection of the treasures of the city.

The Hermitage gallery, which is the largest art gallery in the world, was closed since the outbreak of the Russian revolution. It is now a museum for the collection of the treasures of the city. It is now a museum for the collection of the treasures of the city. It is now a museum for the collection of the treasures of the city.

A PLOT

"You've done very well that I saved your life, and still you refuse me." "I give you know very well that I intended that Regie Milhous should save me that time."

READY FOR ACTION

A newly commissioned cadet was officer of the day and was testing the sentries. It was raining and one of the guards had placed his belt and revolver under his pea coat. The cadet proceeded to bow him out in proper military style and wound up by saying: "You're a fine guard! What would you have done had I been an enemy in disguise and had grabbed you by the throat like this?" and he gripped the guard's neck with his hands.

"I would have said, 'Hands up,'" said the sentry as he placed the muzzle of the ensign's revolver under the officer's own chin.

HIS ESTIMATE

A private in one of the camps was asked by an old lady to be promoted.

IGNOBLE USE

"The French seem to defend themselves on the Americans."

DURING THE BARRAGE

The Yank What-a-all excited about Tommie?

DRAWING A DISTINCTION

"Did you go away and take a vacation this summer?"

NEW YORK NEWS

ITEMS IN BRIEF

Paragraphs of Interest to Readers of Empire State.

News of All Kinds Gathered From Various Points in the State and So Reduced in Size That It Will Appeal to All Classes of Readers.

Sanborn reports the largest apple crop in years.

Newark has been released from influenza quarantine.

Lafayette county's United War Work quota is \$50,000.

1376 Buffalo boys now in Uncle Sam's service.

There were 50 deaths from influenza in Buffalo during October.

Grade A milk has been advanced to 26 cents a quart in Buffalo.

All of the produce of Castle have stopped loading apples in bulk. There is an unusually large crop in this section and owing to the high price of barrels only the best of the crop is being marketed. At one time there were five buyers loading bulk apples there.

The Curtiss and the Pierce Arrow plants in Buffalo are to collaborate in the turning out of a big contract for fighting planes for the government. The Pierce Arrow company will make the engines and the Curtiss plant will build the planes. About 1,200 planes a month will be turned out.

When the Democratic state committee meets at headquarters in Syracuse the latter part of the month, Chairman J. A. Kellogg of Glens Falls will present his resignation. It was announced William H. Kelley of Syracuse or Edward E. Perkins of Poughkeepsie may be chosen as his successor.

The number of places in New York state where intoxicating liquors may be sold legally decreased 6,560 during the fiscal year ending Oct. 10, and there was a consequent loss in revenue to the state of \$4,775,854, state commissioner of excise reports. The total excise revenue for the year was \$15,233,467.

The New York State Agricultural society will hold its second annual meeting, exhibition and sale of sheep in Albany this week. Charles E. Shepard, chairman of the local sheep breeders and feeders' association, has been asked to deliver an address at the meeting relative to feeding west-ern lambs.

James H. Stafford of Buffalo, Erie county food administrator, has enlisted 25 price reporters and hopes to increase the number to 75 before long. They are housewives who keep tabs on neighborhood grocers and dealers in feedstuffs, and will make weekly reports, which after being examined at the Buffalo office will be sent to Washington.

A complete survey of all the coal in the hands of consumers in New York city, and of their requirements for 20 years as well as a list of all homes which have no coal or which buy in quantities of a ton or less, will be made during the week by the police. This step is being taken at the request of the fuel administration to prevent a repetition of last winter's shortage. All the police reserves will be employed in the undertaking.

Genesee County Food Administrator Dean has received a telegram from Charles E. Treman, state food administrator, stating that he had been advised by the sugar division of the federal food administration that the refiners will receive supplementary sugar certificates within a week. These certificates will enable them to obtain more sugar from the wholesalers to take care of the additional pound per person per month that has been allowed.

The official dates for closing New York state's large canal system were announced by the superintendent of public works. The date for closing the Erie, Oswego, Cayuga and Seneca and Black River canals was fixed at midnight, Nov. 25, while the date for the closing of the Champlain canal will be at midnight, Nov. 30, unless the waterways are closed sooner by the canals will not be closed on above dates unless made necessary by weather conditions.

Private medical examinations for men registered for the selective draft are to be permitted under certain conditions, it is announced in a bulletin by the exemption board for Western New York. If draft boards are unable to secure proper quarters suitably equipped, registrants may be sent to private offices of physicians. There is no new the army physical tests, it is now held. Before making arrangements for private examination exemption boards must secure permission from the state draft headquarters.

Mayor Harry C. Walker lieutenant governor-elect left Binghamton to accompany with his clerk for Atlantic City, where he will rest up following his strenuous campaign. A demonstration in his honor is to be held on his return. The election of Mr. Walker as lieutenant governor will result in giving Binghamton a Republican mayor. His successor as chief executive of the city will be Leroy E. Barnes, president of the common council. Mr. Walker will be the fourth Binghamtonian to serve as lieutenant governor.

In accordance with the regulations of the priorities division of the war industries board, every purchaser of agricultural lime in this state must apply through his local farm bureau for a permit from the state representative of the board to purchase any amount of lime in excess of one ton. When making application for permits users must make written agreements that they will not use to excess one ton of agricultural lime to the acre. These applications are carefully considered by the farm bureau agents and if approved are forwarded to the state representative, who grants the permit.

PANEL BLOUSE OF GEORGETTE

popular selection during the season, although a large number of blouses are being shown with moderately high collars. Regardless of becomingness, the collarless blouse is certainly more comfortable, and in these busy days that is a very important consideration.

EASY TO MAKE A LAMPSHADE

Throw a Square Material in Studied Carelessness Over Lined Wire Frame and Start Is Made.

One of the simplest and at the same time most effective lampshades is made by throwing a square material in studied carelessness over a lined wire frame. For the floor lamp this is especially artistic. The frame should be lined with silk, either plain or shirred on, exactly as if it were to be covered with shirred silk or plain panels in the approved lampshade manner of the moment. After that a square of handsome silk, brocade, Japanese embroidery or anything sufficiently valuable to suggest that it remains uncut is thrown over the shade so that the points fall evenly. Heavy fringe may weight the edge, or tassels at the corners will perform the same office. A small hole in the center may have to be worked through the material—that the tip of the electric fixture which holds the shade may work through. The silk could be tacked very lightly here and there to the lined frame to keep it from slipping out of place.

OF INTEREST TO WOMEN

Very lovely is a frock of tulle and velvet combination, trimmed with silk fringe, the sleeves of which are elbow length and cut kimono fashion in one with the bodice.

Chenille embroidery, combined with beads, is the charmingly effective trimming seen on some lovely frocks of satin.

In millinery the color combination of French blue and black is exceedingly popular, and to a less degree is noted seal brown and henna—the color formerly known as terra cotta.

Frocks of puffed velvet, trimmed with silk braid are very smart; in fact, velvet frocks, both plain and trimmed in many ways, are a delightfully attractive mode of the moment.

Formless Blouses and Coats

Cheruit makes extremely wide and formless blouses and coats, and she, like Lanvin, uses these long loops, which are really slings. Undoubtedly they were suggested by the sight of the wounded in Paris, and the fact that the dressmaking houses in France turned out so much of the essentials for the hospitals.
