Important Sale of "Sample" Little Crapsey Dresses Millinery 300 Brand New Hats

The untrimmed hats would cost more than we are asking for these. They are "sample" hats from two of the best makers in New York City—every one brand new and showing the latest Fifth Avenue ideas. The trimmings—also new—came from a manufacturer who was closing out his stock. This accounts for these absurdly low prices. These hats would sell regularly from \$10 to \$25. The special sale prices are

\$5.95 \$7.95 \$9.95

They are satin' antique, beaver, Lyons velvet, fine felt and fur.

Trimming consists of fur, flowers, embroidery, fancies and ostrich. Ostrich is particularly good. There is the graceful "drenched" ostrich, the glycerined ostrich, the softly curled ostrich, and the ostrich shooting straight up from the hat in a military manner.

As for shapes—you may choose from turbans, sailors, mushrooms, tams, continentals and handsome dress hats.

Satin antique on top and shaggy beaver cloth underneath is a smart combination. You will also notice many soft crowns.

Women who are going away over Thanksgiving will surely want one of these new hats for the trip. Second Floor

You will find them in the French Room where everything for children, in the way of clothing, is conveniently arranged.

Made of the finest materials, every stitch and bit of embroidery done by hand—they are really adorable.

The finer ones are of white flaxon with pink, blue or self smocking, and perhaps some wee rosebuds embroidered on them. One cute style ties in back with high butterfly bows of the material—apron fashion.

For everyday wear there are dresses just as pretty but more substantial of heavy Japanese crepe and Peter Pan cloth in clear bright colors. Such lovely soft blues, pinks, yellows, tans and browns. They are made in more ways than we have time to tell, but you may rest assured that every one is a masterpiece. One,

for instance, is deeply shirred across the front, and embroidered on top of the shirring in a most unusual manner. These are in sizes to fit 2 to 12 year old little girls.

Then there are winsome white baby dresses, simply smoked in white or color at neck and wrists.

The little boys, too, come in for their share of these fine things for there are pretty little white and colored wash suits with trousers made in the same careful, artistic manner as the dresses. Second Floor

The Importance of Looking Things Up

Nowadays it is necessary to know, not guess. The guesser goes wrong and loses. The one who knows is the one who wins, and in order to know, we must look things up as they come up. To do this and do it right, we must have at hand a reliable down-to-date, general reference work, such as

The New International Encyclopaedia

This is the second edition, recently completed, superbly illustrated. We have made it possible for our patrons to place this splendid work in their libraries at a very reasonable price and upon easy terms of payment. Won't you come and examine it in the different bindings and let us explain fully our offer? Aisle O
