SEVEN "MISTRESSES OF SEA" PEST SPREAD BY MOSQUITO

Including Tyre, Only That Number of Nations Have Right to Title of High Honor.

Mark Sullivan, writing in Collier's "America's Part in the New World"...

The Heritage of Tyre, quotes another writer as follows, referring to nations that have held the position of the "Mistress of the Seas."

"Since the day that man first straddled a floating log and started humanity, adventuring by sea, the intervening centuries have seen seven nations possessed of sufficient genius to dominate the earth's deep waters. During 2248 years Tyre has had but seven true heirs."

Tyre in her turn was the inspiration of all commerce. Irreprovable, all who traded with Tyre were called merchants. Tyre and all vessels of burdened ships of Tyre's dynasties lived by Tyre's credit and died at the calling of her bones. With the passing of Tyre the position went to Carthage, after Carthage to the Italian cities, Venice, Genoa, Florence and Naples.

Italy had her dominance for 700 years until the Hanseatic League of cities took the crown of commerce to the Baltic sea. Then Portugal forced her way to the front. Then was preceding the discovery of America by Spain.

With the aggressiveness of which the discovery of America by Spain was characterized, Spain took the lead to the Pacific. From Portugal, in 1492, to 1500, and from 1500 to 1600, the Dutch held the position of the "Mistress of the Seas."

PLANT DESERVING OF PRAISE

Witch Hazel Has Many Qualities Which Entitle It to Commendation—Valuable in Medicine

In an article on the Witch Hazel in Book Life, Dr. Edward S. Burton writes of the last flower of the season on the witch hazel as follows:

"If we should look at the witch hazel as the last flower of the season, it would not be the body pruned. But if we consider it in connection with its leaving of the cold weather, we would give it the first prize. No other flower of the year so bravely withstands the cold weather. It is gone to bloom in November or even a little earlier and large quantities of its twigs until the first of January, or even later, sprinkling the woods with its feathery, shiny golden blossoms. It is said also that the tree is one of the ingredients of a certain well known extract of witch hazel. This extract is a valuable medicinal preparation in regard to its curative effects as a dressing and a wash for the skin. It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids."

That witch hazel probably originated in the mountains of the Appalachian region, which has been the home of the witch hazel since the time of the first settlers. It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids."

It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids. It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids."

It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids. It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids."

SCIENTISTS HAVE TRACED CAUSE OF DISEASE THAT HAS LONG BEEN PREVALENT IN THE TROPICS.

One of the most peculiar of all diseases is malaria, common in the tropics. In the blood of persons suffering from it there are found innumerable little worms that can be seen only by the aid of a microscope. These are present only at night in the blood that is circulating. At about five o'clock in the afternoon they begin to appear in the blood, having been hidden away in the body until this time and then they remain in the circulation until about midnight, when they begin to diminish. By eight or nine o'clock in the morning they have all disappeared and a search of the blood under the microscope after this fails to reveal any. They are now collected in certain large blood vessels deep in the body especially in the lungs, where they remain hidden until they go out on their next nocturnal excursion.

The parasite is conveyed to human beings by the bite of certain kinds of mosquitoes. The mosquito bites and takes from a man, or from some animal, as the case may be, blood which contains these small worms. In the stomach of the mosquito (the parasite here) the parasite goes through certain definite changes in its body. It grows and multiplies and then it is ready to be conveyed to another human being. It is necessary to be completely free of parasites of all kinds. The best way to be free of parasites is to keep the body clean and to use a good disinfectant. It is also necessary to keep the body clean and to use a good disinfectant. It is also necessary to keep the body clean and to use a good disinfectant.

ODD BELIEF ABOUT GEESE

Long Ago It Was Universally Thought That They Originated From the Barnacle

The popular sixteenth century belief that geese originated from the barnacle was not confined to the uneducated but was shared even by naturalists. John Gerard, in his "Herball" (or General History of Plants) printed in London in 1597 in giving a description of this marvel says he only tells what others have seen and heard. He says that the geese are born in November or even a little earlier and large quantities of their twigs until the first of January, or even later, sprinkling the woods with its feathery, shiny golden blossoms. It is said also that the tree is one of the ingredients of a certain well known extract of witch hazel. This extract is a valuable medicinal preparation in regard to its curative effects as a dressing and a wash for the skin. It is said to be of great value in the treatment of hemorrhoids, and is also a valuable remedy for the treatment of hemorrhoids."
