

Sibley, Lindsay & Curr Co.

Men's Bath Robes and House Coats

A large section in the rear of Aisle L is set apart for the Men's Bath Robes, Dressing Gowns, House and Dinner Coats.

It is necessary at this time of the year to give a big space to these men's garments as the line is very large and it requires plenty of room to display them properly.

It is such a collection of garments as men who are particular in their tastes will approve. You can choose from them with confidence, without fear that they will not be perfectly satisfactory in every respect.

Care and judgment in the selection of these articles of men's wear by our buyers has made this one of the finest showings of this kind ever made by us.

Bath robes are offered in great variety of coloring and design. There are handsome dressing gowns in deep, rich color tones. The house coats—always popular with men—are well represented, while the finer dinner coats of rich plushes and velvets are masterpieces of the tailor's art.

Table with 4 columns: Bath Robes, Dressing Gowns, House Coats, Dinner Coats. Lists prices for various items.

Rear of Aisle L

WHY NOT?

If you have a quarter round You will surely spend it. Why not turn it into more? All you do is lead it.

Bank it out with Uncle Sam. You will never use it. If you never made a cent Start today to do it.

Just a quarter starts you off On a bank account. Every quarter turned to Stamp Earns a big amount.

Uncle Sam is offering you Stepping stones to riches. All you do is lead the pack. And climb up on the niches. —ANNE OFFERMAN.

As to Shaving.

When it comes to shaving we have the word of Pliny for it that Scipio Africanus was the first man who ever shaved everyday. Whether Mr. Africanus shaved himself or was shaved by a barber, Pliny does not say, but it may be gathered from certain remarks of Tully that this is an important point in any man's habits. Asked if Napoleon cut his own whiskers, the great French statesman replied: "Yes. One born to be a king has someone to shave him, but they who acquire kingdoms shave themselves.

Man's Wonderful Makeup.

No difference how sour a man looks, he contains about 60 lumps of sugar of the ordinary cubical dimensions, and to make the seasoning complete, there are 20 spoonfuls of salt. If a man were distilled into water he would make about 88 quarts, or more than half his entire weight. He also contains a great deal of starch, chloride of potash, magnesium sulphur and hydrochloric acid in his wonderful system.

"Age Cannot With."

A tradesman was brought before the magistrate charged with having sold unwholesome articles for consumption as food. The charge was fully proved. "I wish to point out to the court," said counsel for the defense in a dignified tone, "that the house of business that I have the honor to defend was founded in 1802." "Has it renewed its stock since that date?" asked the magistrate.

Explaining "Yankee."

Yankee "was a cant, favorite word with farmer Jonathan Hastings of Cambridge about 1713. . . . A Yankee good horse, or Yankee cider and the like. . . . The students (of Harvard) used to hire horses of him; their intercourse with him, and his use of the term on all occasions, led them to adopt it."—Will Gordon, "Independence of United States," volume 1, letter 12, page 462.

One Good Point About Him.

Robert did not seem to think the new baby's looks were all they might be. It was his first view of a real new baby and he stood looking down at the little mite with wonder in his eyes. Suddenly it began to cry most heartily and he looked up quickly with a pleased expression in his eyes and said: "Well, mother, he has lots of pep in his cry anyway."

Only Thing He Could Do.

When he wanted to go to the store, he told Jack to take care of Robert, and he went out, and let her out of the pen.

his sight. When mother returned, she found Ramona tied to the forney with a rope around her neck. Mother asked Jack why he did this and he said: "Well, mother, that is the only way I could keep Ramona in my sight."

Study in Strength.

The muscles have their periods of development and decline. The lifting power of a youth of seventeen is 250 pounds; in his twentieth year this increases to 320 pounds, and in the thirtieth year it reaches 365 pounds. By the fortieth year it has decreased eight pounds; at fifty the figure is 330 pounds.

Chinese Love Horses.

China is one of the hosts of the nations of the world to adopt and enjoy the motor-car. Indeed, the conservative Chinese shrink from anything that seems to cast any aspersions upon horses for equines have played a big part in tradition, history and the life of that mysterious land in the far East.

Advantage of Travel.

Travel is a great educator and we noticed in the conversation at lunch on yesterday that a little dab of warmed-over codfish, pierced out with one egg to make it somewhat near enough, had become casserole of Newfoundland cod and oysters.—Ohio State Journal.

Use for Electric Fan in Closet.

An electric fan has not fulfilled all its obligations when it has cooled your house. Set it revolving in a dark, airless closet; it will bring in its wake ventilation, if the door is left open during the process. In addition it will dispossess the moths.

So It Goes.

The Lowry City Independent has an idea that the old fellow who became rich by burning the midnight oil doubtless now has a son who is prodigal with the midnight gas.—Kansas City Times.

Strong Family Resemblance.

"Contentment," remarked Shimbone, "am a mighty fine thing; de only trouble 'bout it is it's kin' o' habd to stingin' from jes' plain laziness."—Boston Transcript.

Truly a Big Mistake.

"A man dat's allus in trouble," said Uncle Eben, "is mighty liable to make de tremenjous mistake of bein' proud o' de fact."

Daily Thought.

All things are in fate, yet all things are not decreed by fate.—Plato.

Widows Must Not Remarry.

In Korea widows never remarry. Even though they have been married only a month they must not take a second husband.

Mahogany Trees.

Mahogany trees do not grow in clusters, but are found scattered throughout forests and hidden in dense undergrowth.

Bludgeons for Blockheads.

A word to the wise—a club to the otherwise.—Boston Transcript.

Value of Quick Decision.

As a rule the man who has trained himself to quick decisions and prompt actions follows close to the right. He does not need to debate questions as does the man who has become a master of deliberation. His mental faculties seem to work automatically and they are generally right. I'm not sure but that they are more often right than they are with the man who is constantly weighing pros and cons and becoming confused with the issues. He saves time because he acts quickly and he saves everybody the uncertainty of indecision.

Chinese Wheelbarrows.

Probably more freight and more passengers are transported in China by the wheelbarrow than by any other land method. The wheelbarrow there used differs from that used by us, in the fact that the wheel is set in the center, and this supports practically the entire load, while the handles are supported in part by a strap or rope over the shoulders of the man who operates it. As a result, the wheelbarrow could in China will transport nearly a half-ton on his vehicle.

Sling Gives Relief.

Great relief from pain in neuritis of the arm has been gained from the use of a sling described by Dr. R. T. Williamson in the British Medical Journal. The sling passes over the shoulder of the unaffected arm and under the elbow of the painful arm in such a way that it slightly raises it. This, by raising the shoulder and collar bone, takes off the pressure upon the nerve roots and prevents the weight of the arm from dragging on these nerves.

Whales That Walked.

Whales used to walk. That is the statement of Prof. d'Arcy Thompson, authority on fishes of the sea, in a lecture on that subject at the Royal Institution, London. He said the whale originally had four feet or fins, but that the two hind ones had simply dwindled away. In bygone ages ancestors of the present family of whales walked about much as seals do.

Thunder and Lightning.

Thunder is caused by electric discharge of lightning. This discharge, in forcing its way through the atmosphere, heats the air and vaporizing it in its path to a high temperature, causing a violent expansion along the whole length of the flash. The result is a deep compression wave, or what is the same, a noise. Lightning is the flash of the electric explosion.

Origin of "Eleventh Hour."

The "eleventh hour" means figuratively the last minute, or, as we sometimes express it, "just in the nick of time." The expression now in general use, comes from the parable narrated in the gospel according to St. Matthew of the laborers hired for the harvest.

After Thirty-Four Years.

A Bath man has just received dividend checks from some shares of a silver mine which he bought 34 years ago and had forgotten all about. A friend who remembered the purchase told him of a notice in some paper that the mine was about to pay its first dividend and he began to cut coupons.

Cathedral.

About forty clergy attended the solemn pontifical centenary mass which was celebrated by Bishop Thomas F. Hickey on Thanksgiving day morning.

Right Reverend Bishop Thomas F. Hickey preached the centenary sermon reviewing briefly the pioneer days and contrasting them with conditions of our day. He then took up the great accomplishments of Bishop Bernard J. McQuaid, the first bishop of Rochester, and the growth of religion since the establishment of the diocese fifty-one years ago.

Hespeke of the two supreme ideas or operations which possessed the soul of him who was destined to lay the foundations for the wonderful growth of clergy, churches, schools and religious institutions with their teaching body during the past, thirty-five years.

"Since 1884," said he, "sixteen churches and two chapels have been built in Rochester, thus showing the rapid growth of our city. In 1888 there were less than forty priests in the diocese; now there are almost six times that number. Then the diocese included only eight counties; now, for some years, twelve, with about eight thousand square miles of territory. Then, a small number of religious women; now they number hundreds."

NEW BOOKS FOR HOLIDAY GIFTS

A New Illustrated Book ST. JOAN OF ARC

The Life-Story of the Maid of Orleans. By Rev. D. Lynch, S. F. With 12 full-page illustrations. Bound in silk cloth, gold stamping. Net. \$2.50; by mail, \$2.75.

Imitation leather, gold edges, \$1.60; postpaid.

American Seal, gold edges, \$2.25; postpaid.

Send all orders to Catholic Journal, Rochester, N. Y.

Surely Not.

Patience—Did she tell you any good? Patience—No. She only talked about herself.—Yonkers Statesman.

Make sure of doing one unselfish deed each day, and soon you will be acting unselfishly all day long.

False Information.

The city farmer was calling on his neighbor and making a few observations on methods in poultry raising. "Mr. Jones," he asked, "how do you manage to have such broilers by the middle of July? My chickens won't be large enough to use for a month yet."

"Well, I dunno," replied Farmer Jones. "The only rule I-foller is to set my hens in the spring."

"In the spring!" exclaimed the new resident. "Why, all my poultry books say emphatically that hens should be set in a dry place." —Kansas City Star.

The Bergamot Tree.

There is but one spot in the world where the bergamot tree can be cultivated with profit, a fact of some importance, since its essence is indispensable in the manufacture of numerous perfumes and medicinal preparations. The spot referred to is Reggio, in Calabria, that extremity of the Italian peninsula which is familiarly known as "the toe of the boot."

Making Gas From Wood.

Experiments on wood as part substitute for coal in gas making have been carried out in France. The wood used was sea pine in the form of billets cut from the middle of the trunk. The charge of the wood was about half the weight of that of coal, and carbonization occupied half the usual time. When running one retort with wood to every two with coal, no appreciable difference in the calorific power of the gas was noted. Of the two by-products—small coke and tar—the former amounted to 5 to 10 per cent.

Bronzing Small Articles.

Small articles may be gilded by immersing them in the following solution, which must be used at nearly boiling heat: Caustic potash, 180 parts; carbonate of potash, 20 parts; cyanide of potassium, 9 parts; water, 1,000 parts. Rather more than one and one-half parts chloride of gold should be dissolved in the water when the other substances are to be added, and the whole boiled together. This mixture is often employed by dealers in cheap jewelry.

No Person Has Seen the Sun.

Astronomers aver that no one has ever seen the sun. A series of concentric shells envelops a nucleus of which we apparently know nothing except that it must be almost infinitely hotter than the fiercest furnace, and that it must amount to more than nine-tenths of the solar mass. That nucleus is the real sun, forever hidden from us. The outermost of the enveloping shell is about 5,000 miles thick, and is called the "chromosphere."

Not as Interesting.

To know thyself is better than trying to find out all about the neighbors. —Toledo Blade.

Chlorine.

One of the most important commercial uses of chlorine is in the bleaching of paper and various cloth fabrics.

Optimistic Thought.

We put too much faith in systems and look too little to men.

"Life-Plant."

There is a creeping moss found in Jamaica called the "life-plant." It is believed to be indestructible by any means except immersion in boiling water or the application of a red-hot iron. It may be cut up and divided in any manner, and the smallest shreds will throw out roots, grow and bud.

Were Built to Endure.

The Egyptian engineer who built the famous water works at Aden constructed the masonry so well that the services of a plumber never have been required. These water works were built 3,000 years before the Christian era and are the most celebrated and antique in the world.

"Highgate."

The word "Highgate" is derived from a gate erected over 400 years ago to receive tolls for the bishop of London. At one time all travelers who tarried at Highgate taverns were required to take an oath never to eat brown bread while they could get white.

Preventive for Cold Feet.

A recent patent covers a shoe to cure cold feet, a heated plate being inserted and the heat being retained by the close-fitting construction of the shoe.
