

EVENING BANKING

THE EAST SIDE SAVINGS BANK announces that beginning this week Saturday, January 10th, the hours for opening new accounts and for deposits on Saturday evenings will be from 5 P. M. until 9 P. M.

Every Monday evening open from 7 P. M. until 9 P. M.

Interest paid on deposits.

The East Side Savings Bank of Rochester

Corner Main and Clinton Streets

FACTS ABOUT COAL

Anthracite, Semi-Anthracite, Semi-Bituminous, Bituminous, Sub-Bituminous, and Lignite Produced in United States

The geological survey of the United States government gives to coal six classifications.

They are: Anthracite, semianthracite, semibituminous, bituminous, sub-bituminous, and lignite. All of these classes are produced in the United States.

Most of the anthracite coal is mined in eastern Pennsylvania. Small areas in the West are placed in the anthracite classification, but are not identical with the Pennsylvania anthracite.

There is very little semianthracite in this country, hence it is but a small factor in the trade.

Semibituminous is of higher rank than bituminous. It has a high percentage of fixed carbon, which makes it almost smokeless. It is regarded as the best coal for steamships, and is used almost exclusively by the navy.

Bituminous coal is produced in a number of grades, but generally speaking, it describes a rank of coal having about equal proportions of volatile matter and fixed carbon. It is only slightly affected chemically by weather, unless it is exposed for several years.

Sub-bituminous is used to designate a rank of coal more generally known as black lignite. It is a clean, domestic coal and ignites readily. It is produced generally in the western states.

Lignite is a product of North Dakota and Texas. The United States and Alaska have beneath their surfaces more than one-half of the unmined coal reserve of the world.

The total unmined coal reserve throughout the world is officially estimated at 8,154,000,000,000 tons. Of this 548,000,000,000 tons is anthracite, 4,302,000,000,000 is bituminous and 3,304,000,000,000 tons is sub-bituminous and lignite.

The unmined reserve of the United States and Alaska is 4,321,000,000,000 tons, of which 22,000,000,000 is anthracite, 2,155,000,000,000 tons is bituminous and 2,054,000,000,000 tons is lignite and sub-bituminous.

The St. Louis district is the center of the bituminous area, and most of the bituminous coal produced in this country comes from the central group of states in and adjacent to the St. Louis coal-producing district.

Restricted Chinese Immigration.

In 1894, on Dec. 7, a convention regulating Chinese immigration was ratified by the United States and China. This agreement prohibited the immigration of Chinese laborers to the United States, but admitted officials, students, merchants and travelers. American laborers at the same time were barred from China.

Peanut Almost Universal.

The native home of the peanut is supposed to be Brazil. From there it spread to Spain, Africa, China, Japan and India. It is called pinder in India, and gober in Africa. It was recognized and cultivated as a valuable agricultural product in those distant countries long before it was commercially grown at home.

A Cerepus Fall.

There are parts of the Midlands where an unrelieved drought has now been endured for two years and nine months, while in other happier spots some showers at odd intervals have been just sufficient to enable farmers to keep their heads above water.—Rand Daily Mail.

Autointoxication.

Autointoxication is self-poisoning and has nothing to do with the modern auto. It is due to toxins produced by bacteria within the body, from pus pockets, decaying teeth, pyorrhea, bad tonsils or from bacterial fermentation in the intestine.

Books.

Some books are edifices to stand as they are built; some are hewn stones ready to form a part of future edifices; some are quarries from which stones are to be split for shaping and after use.—Holmes.

Hint to Reformers.

Doubtless the world is wicked enough, but it will not be improved by the extension of a spirit which self-righteously sees more to reform outside of itself than in itself.—J. G. Holland.

No "Garage" for Him.

Edwin had seen a cemetery where there were many mausoleums. One day he said to his mother: "When I die, I don't want to be buried in one of those garages in the cemetery."

Her "Sorrow Clothes."

Mary Ellen had just finished dressing a clotheopin in black for Hallowe'en and she said, "That clotheopin has lost her husband and has on her sorrow clothes."

NEW REPUBLICS IN EUROPE

Ten Have Come Into Existence as a Result of the Changes Brought About by War

The Eastern Europe Review gives the names and population figures of ten new eastern Europe republics as follows:

Estonia—47,500 square kilometers, 1,740,000 inhabitants, of which 93 per cent are Estonians.

Latvia—64,196 square kilometers, 2,552,000 inhabitants, of which 72 per cent are Letts.

Lithuania—125,000 square kilometers, 6,000,000 inhabitants.

White Russia—300,000 square kilometers, 14,075,000 inhabitants, of which 70 per cent are White Russians.

Ukraine—300,000 square kilometers, 45,000,000 inhabitants, of which 73 per cent are Ukrainians.

Geuba—85,000 square miles, 3,500,000 inhabitants.

North Caucasus—150,000 square kilometers, 4,300,000 inhabitants.

Azerbaijan—100,000 square kilometers, 4,500,000 inhabitants, of which 75 per cent are Turko-Tartars.

Georgia—90,000 square kilometers, 3,000,000 inhabitants, of which 75 per cent are Georgians.

Armenia—320,000 square kilometers, 4,000,000 inhabitants, of which 75 per cent are Armenians.

USING 'SPECS' AS ORNAMENTS

Senegalese Soldiers in France Have Been Keeping the Paris Opticians Exceedingly Busy

Those whom fate has condemned to wear spectacles may have some difficulty in believing that anyone could regard these articles as ornaments, to be worn with pride and pleasure. This, however, remarks a writer in the Continental edition of the London Mail, is nevertheless the case with many of the Senegalese soldiers who fought in the war. While on leave in Paris on their way home, many of these gallant warriors have invested in spectacles as the surest means of impressing their compatriots.

An optician relates that when he tried to sell a pair of spectacles with plain glass to a Senegalese whose sight was obviously excellent, the soldier complained that they were no good because they did not "make everything look funny." The optician immediately supplied the soldier with a pair of concave lenses that would have done very well for a short-sighted student. The customer was satisfied at once, paid, and went out, colliding on the way with various pieces of furniture.

MADE 'EM GIGGLE.

Upon entering the elevator the other morning in a loop office building where I am employed I noticed a pretty girl and was looking at her and thinking how pretty she was when I suddenly realized I must get off at the next floor and called out "six, pretty." The poor elevator man's face turned red and every one in the elevator giggled, and I sure did make my getaway at No. 6. Now I go in at the other entrance of the building and never try to say "six, please." I say just plain six. I never want a more embarrassing moment.—Chicago Tribune.

YOU CAN NEVER TELL.

"That's the jolliest drummer I've met in many a day."
"He certainly is the life of the party."
"A man of such high spirits is bound to be in a congenial line of business. By the way, do you know what he sells?"
"Yes—coffins."—Birmingham Age-Herald.

DISCIPLINE DEMANDED.

"Your boy threw a lump of coal at our cat."
"We'll attend to his case! Not that we care anything about your cat, but no boy of mine is going to waste coal in that manner."

MORE OF IT.

"They say that a lot of people on the Mississippi river, to avoid paying rent, are living in houseboats."
"But don't they have to pay more water rent?"

NOT FOR HIM.

"Women are to be prevented from attempting homemade wine."
"I hope so," exclaimed Uncle Bill Bottletop. "I tasted some once."

NOTHING WRONG ABOUT SINGING

Comedians Need Not Have Worried as to Words of Chinese Song They Did Not Understand

When Fred Stone, the comedian, was in Washington he told how he and his old partner, Dave Montgomery, once learned and sang a Chinese song without knowing what it meant. Eventually the show in which they were singing came to Washington and Montgomery and Stone were horrified one night to notice that the most prominent box in the theater was occupied by members of the Chinese legation. Very nervously the two actors sang the song and then hastily retired to their dressing rooms. A few minutes later announcement reached them that the oriental visitors desired to pay them a call. The two actors almost passed away, fearing that they had offended the Chinese with the song, but finally they braced up and invited the Chinese to come in.

"Could you understand that song that we sang?" Stone asked anxiously.

"Oh, yes," the Chinese said.

"What on earth does it mean," Stone eagerly inquired.

"Oh nothing," casually responded the oriental, "just one, two, three, four, one, two, three, four."

TURKISH WAR DEBT SMALL

Ottoman Empire Spent Relatively Little in the Recent Convulsion of the World

The war debt of the Ottoman empire is said by experts to have increased less than that of any other nation. Her bonded indebtedness was increased by only one new loan of about \$30,000,000, and, adding to this other increases in obligations, such as home military requisitions and advances from America and Germany, her war expenses ran to only \$400,000,000. Consequently, allowing for various offsets, her present indebtedness amounts to about \$2,000,000,000.

This would make it appear that Turkey "ran the war on a tight string," financially, as compared to Great Britain with her \$40,000,000,000 war debt, or France with \$34,000,000,000, and the United States with \$25,000,000,000 and Italy with possibly \$15,000,000,000. It will be recalled that on paper the Ottoman empire mobilized nearly 4,000,000 men, yet she escaped with something like the war expense of a country like little Roumania or Bulgaria.

COAL-A GEM IN PARIS.

Coal in France is so scarce that one may soon be accustomed to seeing the black "gem" in jewelry instead of valuable stones. Already some Parisiennes are wearing rings and pendants in which small pieces of coal replace rich stones in settings. The only preparation the new stone undergoes is dipping in some chemical which puts a gloss on it and at the same time prevents staining.

Such jewels come high, and there is every indication that the fashion will become popular until coal survives in the city in greater quantities for proper uses.

IN DEMAND.

"What is this man charged with, officer?"
"Moonshining," replied the sheriff's deputy.
"Those jugs, I suppose, contain the evidence?"
"Yes, and it's no easy job keeping an eye on this fellow and the jugs at the same time. One is just an apt to disappear as the other."—Birmingham Age-Herald.

IN THE HYMENOPLANE.

Bollen—You must have had an exciting time getting married in the airship.
Kapp—We certainly did. While the minister was tying the knot the aviator was keeping the loop.—Cartoon Magazine.

HENS KILL MOUSE.

Hearing a commotion among his hens, T. A. Chamberlain of Haverhill, Mass., found that one of them had a live mouse in her bill, which she finally killed.

INDISPUTABLE EVIDENCE.

"How do you know he is a successful business man?"
"He plays golf every afternoon and goes to a swimming pool every evening."

"His Name"

"In a beautiful garden where many flowers were many flowers..."

"He was a beautiful man and she loved him..."
