**Goodmore Tire Company.**

A notable success, based on quality and service is that of the Goodmore Tire Co. The business was established in 1914 with one small store, at that time doing a neighborhood business. They now maintain two complete establishments the main store being at 655 Main Street East and the original store at 1308 Dewey Ave.

The Company handles everything in the way of tire and tire service, and their repair departments at both locations, are complete in every detail, the work being done by thoroughly trained and competent men.

They feature Kokomo, Star and Goodyear tires.

The Goodmore Tire Company handles only guaranteed goods and stands back of them. They have built up a quality trade among them. They have built up a quality trade among discriminating tire users who appreciate long tire mileage and fair dealing. Economy in tires does not mean buying a cheap tire to begin with, but rather in selecting a dependable tire at a fair price. This has been the policy of the Goodmore Tire Company.

The company has steadily retained its old customers and regularly gained new ones, its business showing continuous growth. They maintain a free air-line to the curb at both stores, and their air is entirely free from oil. Service and quality are the out-standing features of the business.

**Result of Study**

It is an educational fact as well as interesting to read and know of the study made by the "1900 Washer Co." to make an improvement on their already mechanically perfect machine as it seemed.

The important principal in making clothes clean at first—was a disc to create an action of clothes through water. By intense study the "1900" people conceived the idea of a washer which would create an action of water through clothes instead and thereby eliminate the wear and tear of the garments and obtain, not only just as good, but better cleaning results.

The out come of all this study we find in the "1900 Cataract" washer which is decidedly the most ideal type of washer to be desired.

Mildred Maddocks—director of the Good House Keeping Institute most heartily endorses it and makes this statement: "In this oscillating type no harm can happen to the linen under any circumstances of use—even the most careless, and for this reason it is often called the Waste Machine best adapted for fine laundering."

The Good House Keeping Shop at 136 Franklin St. are distributors of these washers in Rochester.

**Roofers Should Know Business**

Though the roof is the most important part of the building it is often the least considered until necessity arises. It is however, most wise to let the Right Roofing man look to this before the necessity does come, as it is sure to cause much trouble and expense.

The M. C. Lewis Co., 363 North St., have been established in this business for some years and are experienced and dependable workmen in this particular line.

They are prepared to estimate on slate surface shingles, rubber, asphalt, tin, etc.

Also they will install furnaces of all kinds and assure you of "Heating, that Heats!"

**The Novelty Glove Shop**

There is no other one establishment more worthy of prominent mention than that of the Novelty Glove Shop conducted by Jacob Libglid at 69 South Avenue, this city.

Prior to the opening of his store in Rochester Mr. Libglid resided in Gloversville, N. Y., the home of the Glove industry and was employed in some of the largest glove factories there, which places him in a position to know the glove business from Alpha to Omega.
