"SAVE THE SURFACE, YOU SAVE YOUR CAR

Save the surface and you save all, is the saying regarding house and floor finishing or painting, this same applies to your auto. Why let your car look shabby when I am ready to refinish it for you at a reasonable cost. Call and let me estimate on your car, C. PHILLIPS, Stone 5348-L.

Paint enhances the natural beauty of the machine and preserves it unmarred by the daily wear for the season. It is always cheaper to paint before it is needed, than afterwards. Takes less paint, costs less to put it on.

It is essential that the paint be durable, adapted to the surface it adorns and protects, and applied by a painter, "that's me" who knows his business. Paint your car and it will look like new and keep that shiny new appearance.

You are easily annoyed by the noise of a loose bolt or by a squeak in your car and cannot ride peacefuly until you have same looked into and taken care of. Why not be just as eager to ride in a clean car, one that has a fresh look by having it painted. It adds to the beauty and attractiveness of your machine and brings out your true character, as you know, now-a-days, a man or woman makes friends by the kind of a car they drive and its well kept appearance. Call and let me estimate on your car, 105 WOODBURY ST., near Hudson.

LET US TAKE CARE OF YOUR BATTERIES

Where shall you find the right place to have your batteries recharged? Right here, Ross Battery Station, 419 Thurston Road. We charge, repair and replace batteries. All our work done by experts.

Prompt and careful service is the watchword of our business. When you call Genesee 3311-J you may feel perfectly sure we will respond quickly to your wants.

The service your want, we don't "hide our light under a bushel basket." Our work is of high-grade quality and we know it. We keep on telling you about it because we want you to try it. Bring in your batteries and we will prove it to you.

If you want your car to be of advantage to you, to be in proper running order, look after your batteries today. We wil be glad to furnish information regarding any question on the care of batteries in which you as a car owner are interested in.

The trouble season is coming! Late Fall—Winter. The time of the year when more than ever you should have that satisfaction enjoyed by knowing that our road service is at your disposal. A phone call promptly brings us anywhere. "Service with a smile."

DIDN'T WANT ACT "CRABBED"

Knockout Comedian Feared Caruso Might Trespass on Territory That Belonged to Him.

At a benefit in New York in which many theatrical stars appeared for charity, a well-known knockabout song-and-dance man was to go on at 9 o'clock so as to get back to the roof garden for his regular stunt at 11. As he waited in the wings, he noticed a heavy-set man walking to and fro, with an air of impatience, on the other side of the stage.

"Who is that guy there?" he asked the stage manager.

"Why" — the manager looked surprised—"why, that is Caruso."

"Does he go on here tonight?"

"Sure, he does. He is going to sing a couple of songs."

"Well," said the knockabout man a little sourly, "tell him to sing anything he likes, but to lay off 'The Darktown Strutters' Ball.' I use that for an opener and I don't want it crabbed!"

Her Reason.

'Cindy, who had served her mistress faithfully for some months, suddenly announced her intention of leaving.

"Why, 'Cindy," said the lady, aghast at such a misfortune. "I thought you were pleased with your position. I'm sure pleased with you. What can be the trouble?"

"Well, ma'am, I tell yo' how 'tis. They's too much movement o' the dishes fo' de fewness ov de vittles."—Harper's Magazine.

QUALITY AND SERVICE

Make certain that your vacuum cleaner is one of general usefulness, such is the Sweeper-Vac. It not only cleans rugs, carpets and hardwood floors but it also thoroughly frees tapestry and upholstery from dust and hangings and performs in minutes cleaning, sweeping and dusting that usually requires hours of hard work.

You will soon discover why the Sweeper-Vac is known as two complete cleaners in one. It gives you two distinct types of cleaning by powerful suction alone, or by powerful suction plus the gentle sweeping action of its motor driven brush.

The correctly speeded motor driven bush is necessary to thoroughly and quickly removes threads and lint. If you wish the powerful suction alone, as when housecleaning attachments are to be used, stop the brush by simply moving the convenient lever. Call us, Wallace Electric Company, 405 Main St. East, Stone 3583.

We also carry electric washing machines, irons, and to make it in full, we have everything in the electrical line and do electric wiring. When in need of things electrical an opportunity to quote will be appreciated by William S. Wallace, manager. Come in and look over our line of goods and give us your order.

Makes His Coats Last.

Frank S. Stone, of Westboro, Mass., says the Boston Globe, has worn the same overcoat for 35 winters, and he says it is good for ten more. For bit [illegible] he has a heavier coat which [illegible] in service for only 20 years. [illegible] says styles travel in a circle [illegible] on the average every five [illegible] year-old coat having been [illegible] of fashion seven times.

Owed Their Lives to Parrot.

In the terrible earthquake in 1908 which destroyed several cities in Sicily, many people were imprisoned under the ruins of their houses, and were rescued only because they made their voices heard by rescue parties. In one case a voice was heard from a great pile of ruins crying, "Maria! Maria!" Several hours were spent by a band of eager diggers in removing overturned stone and debris, at the end of which a hungry gray parrot was discovered. In a fit of rage the men were about to dash the bird to bits when one of them noticed a movement in the pile of plaster on what had been the first floor of a mansion. Two women were buried there, both alive as it turned out, and both recovered from their awful experience, thanks to the good voice and education of poor Poll!

More than a hundred thousand perished in that one city of Messina alone, all the buildings in it being shaken to the ground in 31 seconds.

Liquefying Carbon.

Carbon may be melted and maintained in a liquid condition, according to the experiments of a French investigator. The heating was effected under great pressure in the electric furnace, and a curious phenomenon was noticed at 1,500 atmospheres, namely, that after a brief failure of the arc the current refused to pass even when the power was much increased. It is supposed that as the carbon passed into a liquid and transparent state, it assumed a rare allotropic form, becoming a nonconductor. The test was too brief for a study of this condition, but was made to include a sudden cooling of the molten carbon by a flooding with water of the interior of the pressure vessel. The minute diamonds were recognized in the gray powder thus obtained, the result being, however, not wholly satisfactory.

Largest Coin in the World.

Probably the largest coin in the world is one belonging to Farran Zerbe, internationally famous expert on rare coins. It is a piece of stamped copper plate 10 inches square and weighs 6½ pounds. It has a value of "4 daler" (the daler was a coin of varying value) stamped on it, and the date 1730. Such coins were commonly used in Sweden for some time during and after the wars of Charles XII. It is part of a collection of more than 30,000 specimens, representing mediums of exchange of all countries and periods from the earliest times to the present day.
