**Rochester Auto Spring Company.**  
The Rochester Auto Spring Company who are located at 20 Joseph Ave., is equipped with the best of fitting to do the best job on broken springs in the city. You will never realize what 'Perfection' Spring repair is until you have tried out the work of this company.

This firm is prepared to fix any kind of a broken spring having the most experienced men in this line of work possible. If you are out on the road they will come after you and if you are not able to spare your car during the day they will beglad to do your repair work at night.

You must remember that springs especially automobile springs need looking over very often at least once a year. After a hard winter such as we experienced this year when the roads and streets have been so bad the springs especially need looking over. If you have not had this done, better not let it go any longer. This precaution often saves time spent on the road and extra expense too.

If you will drive into the garage of the Auto Spring Co., they will look over your springs at a minimum cost. Don't put this necessary duty off.

**Thos. H. Eddy Cash Register Systems Expert says:**

"Business conditions are wonderful; The month of May just past was the largest months business in the history of Thomas H. Eddy, nine years in the Cash register business. The question arises, why the big business? Because of the faith and confidence of merchants in Rochester and vicinity have in us also the fact we have saved hundreds of merchants in this district from 25 to 50 per cent in purchase price and that they are not sold to any one particular cash register.

The only difference between a National cash register we sell and one purchased from the factory is the money you save, they both do the same work. We guarantee our registers one year, sold on easy terms, no interest charge added.

Before purchasing a cash register of any make investigate our prices, give us a call and be convinced that we can save you money; investigate, no obligation to purchase. We are pleased to show our registers. We are select sales agents for the New American Cash Register St. Louis Cash Registers and the Add-Index Combination Cash Register and Adding Machine. Mr. Eddy is located at 14 North Water Street and his telephone number is Main 7643.

Mexico, Former Home of Boll-Weevil. Economically speaking, the cotton boll-weevil is by far the worst insect enemy of mankind. Cotton clothes the world, and we produce in this country four-fifths of all that is grown.

The earliest home of the boll-weevil seems to have been the plateau region of Mexico or Central America. As an enemy of the cotton, it first attracted attention in 1843, near Vera Cruz. Thereafter its spread was rapid, and in parts of Mexico its depredations caused abandonment of cotton growing. Not until 1892 did it invade the United States. In that year it crossed the Rio Grande near Brownsville, having obtained a good foothold in Texas by 1894. The boll-weevil proceeded to extend its range, and has since spread at a rate of 40 to 160 miles annually.

**The J. C. Clancy Carting Company.**

A good solid concern that renders service every day in the year is the J. C. Clancy Carting Company which was established in 1885 by J. C. Clancy and has its present location at Webster Ave., corner of Grand Ave. The residential location being 111 Parsells Avenue. This Carting Company is one of the oldest and most dependable concerns in the city, and does a variety of business. General trucking, express work, moving, all three kinds of work are done speedily and efficiently whether the work is local or long distance. Shipments are certain to receive the best of care and will be put through in quick time.

The Clancy Company is now operating modern well appointed motor trucks and also four other rigs, the vans are all well equipped for cross country hauling, and the Company has given a very good account of itself in the rapid transferring of furniture, freight and other merchandise not only on short hauls but on out-of-town moving so well.

J. C. Clancy and his sons are adhering to the principles of square dealing and dependability and have rightfully gained considerable recognition among the industrial commercial and private interests of Rochester and vicinity for the fine class of service that they are rendering the community.

## WORD MAKES A DIFFERENCE

Controversy at Philadelphia is a Case in Point, and There Have Been Many Others.

In the case of a Philadelphia woman who served as a stenographer in France during the war, and has since passed away, the government has declined to refund a tax payment of \$66,894 made by her estate, on the ground that she was not "in" but merely "with" the military forces in France.

Much depends on a single word, and the case is to go before a jury, the Philadelphia Public Ledger says. There are many historic instances of controversy over a word. Goldwin Smith said the Civil war was fought on a point of grammar—whether it should be "the United States is" or "the United States are." Church councils in the Middle Ages were "by schisms rent asunder" over the use of the word "filioque" in the creed, and there are similar divergences over other terms. "In the beginning was the Word"—and that word, the Greek "logos," has itself been the theme of interminable discussion. The speaker who has the malady which in the Thaw trial was termed "logorhea" has no understanding of the art of one who makes every word count for its value and do its work.

Trees Demand Much Light. In some natural pine forests, where the trees grow very close together, statistics show that more than 4,000 trees per acre die between the ages of ten and eighty, and that only 300 out of the remainder die between the ages of eighty and one hundred. With some this natural dying proceeds faster than with others. With pine, birch, aspen and all species which demand a great deal of light, the death rate is enormous. The spruce, beech, fir and, generally speaking, all species which are satisfied with less light are not affected so seriously.

What He Was Looking For. "Have you a book writ by a feller named Euclid?" The bookseller was disconcerted for a moment, but finally admitted that he had. "I'm in the movie business," continued the stranger, "and I think maybe this book would make a good five-reel feature." "What gave you that idea?" "I overheard a literary guy talking about it. He said it was full of triangles."
